# Laboratory standard—upper limit of normal range for creatine kinase myocardial band isoenzyme, total micrograms per litre N[NNN]

### Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Creatine kinase MB isoenzyme—upper limit of normal range (micrograms per litre)
METEOR identifier:	284965
Registration status:	Health, Superseded 01/10/2008
Definition:	Laboratory standard for the value of creatine kinase myocardial band (CK-MB) isoenzyme measured in microgram per litre that is the upper boundary of the normal reference range.

# Data element concept attributes

#### Identifying and definitional attributes

Data element concept:	Laboratory standard—upper limit of normal range for creatine kinase myocardial band isoenzyme
METEOR identifier:	284929
Registration status:	Health, Standard 04/06/2004
Definition:	Laboratory standard for the value of creatine kinase myocardial band (CK-MB) isoenzyme that is the upper boundary of the normal reference range.
Object class:	Laboratory standard
Property:	Upper limit of normal range for creatine kinase myocardial band isoenzyme

# Value domain attributes

#### Identifying and definitional attributes

Value domain:	Total micrograms per litre N[NNN]
METEOR identifier:	284897
Registration status:	Health, Superseded 01/10/2008
Definition:	Total number of micrograms per litre ( $\mu$ g/L).

#### **Representational attributes**

Representation class:	Total	
Data type:	Number	
Format:	N[NNN]	
Maximum character length:	4	
	Value	Meaning
Supplementary values:	9999	Not stated/inadequately described
	8888	Not measured
Unit of measure:	Microgram per litre	(µg/L)

#### Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

## Data element attributes

#### **Collection and usage attributes**

**Guide for use:** Record the upper limit of the creatine kinase myocardial band (CK-MB) normal reference range for the testing laboratory.

#### Source and reference attributes

Submitting organisation: Acute coronary syndrome data working group.

#### **Relational attributes**
