# Person—clinical evidence status (stroke), code N

## Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Clinical evidence of stroke (status)
METEOR identifier:	285293
Registration status:	<a href="#">Health</a> , Superseded 01/10/2008
Definition:	The status of evidence for a pre-existing clinical condition of stroke, as represented by a code.
Data Element Concept:	<a href="#">Person—clinical evidence status (stroke)</a>
Value Domain:	<a href="#">Clinical evidence status code N</a>

## Value domain attributes

## Representational attributes

<b>Representation class:</b>	Code	
<b>Data type:</b>	Number	
<b>Format:</b>	N	
<b>Maximum character length:</b>	1	
	<b>Value</b>	<b>Meaning</b>
<b>Permissible values:</b>	1	Objective evidence
	2	No objective evidence

## Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
--------------------------	--

## Data element attributes

## Collection and usage attributes

Guide for use:	For ischaemic: non-haemorrhagic cerebral infarction, objective evidence is coded where the diagnosis is supported by cerebral imaging (CT or MRI),  or  For haemorrhagic: intracerebral haemorrhage, objective evidence is coded where the diagnosis is supported by cerebral imaging (CT or MRI).
Collection methods:	For each Person—concurrent clinical condition (acute coronary syndrome), code NN, the data elements Person—clinical evidence status (chronic lung disease), code N; Person—clinical evidence status (heart failure), code N; Person—clinical evidence status (stroke), code N; Person—clinical evidence status(peripheral arterial disease), code N; Person—clinical evidence status (sleep apnoea syndrome), code N must also be recorded.

## Source and reference attributes

Submitting organisation:	Acute coronary syndrome data working group
Steward:	<a href="#">The National Heart Foundation of Australia and The Cardiac Society of Australia and New Zealand</a>

## Relational attributes
