Value Domain:	Name conditional use flag code N

Value domain attributes

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Unreliable information
	2	Name not for continued use
	3	Special privacy/security requirement

Data element attributes

Collection and usage attributes

Guide for use: A single Person name may have multiple Name conditional use flags associated with it. Record as many as applicable.

CODE 1 Unreliable information: should be used where it is known that the name recorded is a fictitious or partial name. These names should not be used for matching client data.

CODE 2 Name not for continued use, indicates that this name should NOT be used when referring to this person. The name is retained for identification purposes only. For Aboriginal and Torres Strait Islanders, certain tribal names may become 'not for continued use' due to the death of a relative.

CODE 3 Special privacy/security requirements— may apply to names for which episodes are attached that should only be accessible to specified authorised persons. There must be a specific need to implement this additional security level. Local policy should provide guidance to the use of this code.
