

Person—date of death

Metadata item type:	Data Element Concept
Synonymous names:	Date of death
METEOR identifier:	287299
Registration status:	<ul style="list-style-type: none">• Community Services (retired), Standard 30/09/2005• Disability, Standard 13/08/2015• Health, Superseded 05/10/2016• WA Health, Standard 19/03/2015
Definition:	The date of death of the person.
Context:	Required for: <ul style="list-style-type: none">• statistical survival analysis for derivation of the length of time between diagnosis with primary cancer and death• where it is necessary to identify that a person has died (e.g. in a longitudinal health record or provider index).

Object Class attributes

Identifying and definitional attributes

Object class:	Person
Definition:	A human being.

Collection and usage attributes

Comments:	Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the <i>Australian Government Guidelines on the Recognition of Sex and Gender</i> and the Australian Bureau of Statistics (ABS) <i>Standard for Sex and Gender Variables</i> , which recognise that there are sex and gender types that are not exclusively male or female.
