Value	Meaning								
9	Not stated/inadequately described								

### Collection and usage attributes

**Guide for use:** Diagnosis and procedure codes should be checked against the national ICD-10-AM sex edits, unless the person is undergoing, or has undergone a sex change or has a genetic condition resulting in a conflict between sex and ICD-10-AM code.

CODE 3 Intersex or indeterminate

Intersex or indeterminate, refers to a person, who because of a genetic condition, was born with reproductive organs or sex chromosomes that are not exclusively male or female or whose sex has not yet been determined for whatever reason.

Intersex or indeterminate, should be confirmed if reported for people aged 90 days or greater.

**Comments:** The definition for Intersex in Guide for use is sourced from the ACT Legislation (Gay, Lesbian and Transgender) Amendment Act 2003.

## Source and reference attributes

**Origin:** Australian Capital Territory 2003. Legislation (Gay, Lesbian and Transgender) Amendment Act 2003

**Reference documents:** Legislation (Gay, Lesbian and Transgender) Amendment Act 2003. See <http://www.legislation.act.gov.au/a/2003-14/20030328-4969/pdf/2003-14.pdf>.

## Data element attributes

## Collection and usage attributes

<b>Collection methods:</b>	<p>Operationally, sex is the distinction between male and female, as reported by a person or as determined by an interviewer.</p> <p>When collecting data on sex by personal interview, asking the sex of the respondent is usually unnecessary and may be inappropriate, or even offensive. It is usually a simple matter to infer the sex of the respondent through observation, or from other cues such as the relationship of the person(s) accompanying the respondent, or first name. The interviewer may ask whether persons not present at the interview are male or female.</p> <p>A person's sex may change during their lifetime as a result of procedures known alternatively as sex change, gender reassignment, transsexual surgery, transgender reassignment or sexual reassignment. Throughout this process, which may be over a considerable period of time, the person's sex could be recorded as either Male or Female.</p> <p>In data collections that use the ICD-10-AM classification, where sex change is the reason for admission, diagnoses should include the appropriate ICD-10-AM code(s) that clearly identify that the person is undergoing such a process. This code(s) would also be applicable after the person has completed such a process, if they have a procedure involving an organ(s) specific to their previous sex (e.g. where the patient has prostate or ovarian cancer).</p> <p><b>CODE 3</b> Intersex or indeterminate</p> <p>Is normally used for babies for whom sex has not been determined for whatever reason.</p> <p>Should not generally be used on data collection forms completed by the respondent.</p> <p>Should only be used if the person or respondent volunteers that the person is intersex or where it otherwise becomes clear during the collection process that the individual is neither male nor female.</p> <p><b>CODE 9</b> Not stated/inadequately described</p> <p>Is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.</p>

**DSS specific information:**

For the Adoptions DSS, code 3 Intersex or indeterminate is not collected.

Sex is collected up to three times: once for the adopted child subject to a finalised adoption; once for the adoptive parent(s); and once for the adult adopted person (aged 18 years or older) if they lodge an application for information. When collecting for the adopted child or adoptive parents use code 9 (Not stated/inadequately described) if sex is unknown. Note that when collecting for the adoptive parents, some children may be adopted by single parents or same-sex couples.

[Adoptions DSS 2018-19Children and Families](#), Superseded 20/01/2021

**Implementation start date:** 01/07/2018

**Implementation end date:** 30/06/2019

[Adoptions DSS 2020-21 Children and Families](#), Standard 03/11/2021

**Implementation start date:** 01/07/2020

**Implementation end date:** 30/06/2021

**DSS specific information:**

Intersex or indeterminate, refers to a person, who because of a genetic condition, was born with reproductive organs or sex chromosomes that are not exclusively male or female or whose sex has not yet been determined for whatever reason.

Sex is collected up to three times: once for the adopted child subject to a [finalised adoption](#); once for the [adoptive parent](#)(s); and once for the adult adopted person (aged 18 years or older) if they lodge an application for information. When collecting for the adopted child or adoptive parents use code 9 (Not stated/inadequately described) if sex is unknown. Note that when collecting for the adoptive parents, some children may be adopted by single parents or same-sex couples.

For [known child adoptions](#), the sex of an adopted child is their sex at the time the adoption order was granted. For [local](#) and [intercountry adoptions](#), it is the sex at the time when the child was [placed](#) with the adoptive family.
