Data element attributes

Collection and usage attributes

Guide for use:

CODE 1 Formal self-assessment

The service provider organisation undertakes formal self-assessment, on a routine basis, against the agreed criteria outlined in the defined industry standards.

A formal self-assessment should involve a number of aspects, including the planning and development of a clear structure for the assessment process; the use of an accepted evaluation method such as a peer review; and the use of validated tools where these are available.

CODE 2 In-depth external review

The service provider organisation routinely undergoes an in-depth review against the defined industry standards by an independent external reviewer. This may take place in the context of an accreditation process for the service provider organisation.

Collection methods:

More than one code can be recorded.
