Data element attributes

Collection and usage attributes

Collection methods: Report the review/accreditation status at 30 June for each service unit for the National standards for mental health services using the standard set of codes shown in the value domain.

For organisations that include more than one service unit the codes relating to each service should be completed. Reporting of progress at the individual service unit level recognises that parts rather than whole organisations may be implementing the standards.

NOTE: for admitted patient setting only, these data need to be disaggregated by specialised mental health service program type and specialised mental health service target population.
