Episode of community based palliative care—cessation reason

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	287887
Registration status:	Health, Recorded 13/05/2008
Definition:	The reason a client's episode of community-based palliative care ends.

Object Class attributes

Identifying and definitional attributes

Object class:	Episode of community based palliative care
Definition:	The period of time between the start and cessation of community based palliative care, during which a patient with a life-limiting illness and/or their carer(s)/family/friends receives services in a community-based setting from a specific agency to improve their quality of life.

Collection and usage attributes

Guide for use:	An episode of community based **palliative care** commences when the patient has been assessed and accepted for care by the service provider and the patient has consented to receive care. The episode ends when the patient dies, or discharge (case closure) occurs for another reason.
	During an episode of community based palliative care, a patient may be admitted to hospital (or a hospice) to receive care. The community based episode of care would continue as long as there is an expectation that the patient would be returning to the care of the community based palliative care service provider.
