

Date accuracy indicator code AAA

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	289952
Registration status:	<ul style="list-style-type: none">• Community Services (retired), Standard 30/09/2005• Disability, Standard 07/10/2014• Early Childhood, Standard 21/05/2010• Health, Standard 04/05/2005• Homelessness, Standard 23/08/2010• Housing assistance, Standard 23/08/2010

Definition: A code set representing the accuracy of the components of a date.

Representational attributes

Representation class:	Code
Data type:	String
Format:	AAA
Maximum character length:	3

Permissible values:

Value	Meaning
AAA	Day, month and year are accurate
AAE	Day and month are accurate, year is estimated
AAU	Day and month are accurate, year is unknown
AEA	Day is accurate, month is estimated, year is accurate
AEE	Day is accurate, month and year are estimated
AEU	Day is accurate, month is estimated, year is unknown
AUA	Day is accurate, month is unknown, year is accurate
AUE	Day is accurate, month is unknown, year is estimated
AUU	Day is accurate, month and year are unknown
EAA	Day is estimated, month and year are accurate
EAE	Day is estimated, month is accurate, year is estimated
EAU	Day is estimated, month is accurate, year is unknown
EEA	Day and month are estimated, year is accurate
EEE	Day, month and year are estimated
EEU	Day and month are estimated, year is unknown
EUA	Day is estimated, month is unknown, year is accurate
EUE	Day is estimated, month is unknown, year is estimated
EUU	Day is estimated, month and year are unknown
UAA	Day is unknown, month and year are accurate
UAE	Day is unknown, month is accurate, year is estimated
UAU	Day is unknown, month is accurate, year is unknown
UEA	Day is unknown, month is estimated, year is accurate
UEE	Day is unknown, month and year are estimated
UEU	Day is unknown, month is estimated, year is unknown
UUA	Day and month are unknown, year is accurate
UUE	Day and month are unknown, year is estimated
UUU	Day, month and year are unknown

Collection and usage attributes

Guide for use:

Any combination of the values A, E, U representing the corresponding level of accuracy of each date component of the reported date.

This data element consists of a combination of three codes, each of which denotes the accuracy of one date component:

A – the referred date component is accurate

E – the referred date component is not known but is estimated

U – the referred date component is not known and not estimated.

This data element contains positional fields (DMY) that reflects the order of the date components in the format (DDMMYYYY) of the reported date:

Field 1 (D) – refers to the accuracy of the day component;

Field 2 (M) – refers to the accuracy of the month component;

Field 3 (Y) – refers to the accuracy of the year component.

Data domain	Date component (for a format DDMMYYYY)		
	(D)ay	(M)onth	(Y)ear
Accurate	A	A	A
Estimated	E	E	E
Unknown	U	U	U

This data element is valid only for use with dates that are reported/exchanged in the format (DDMMYYYY).

Example 1: If a date has been sourced from a reliable source and is known as accurate then the Date accuracy indicator should be informed as (AAA).

Example 2: If only the age of the person is known and there is no certainty of the accuracy of this, then the Date accuracy indicator should be informed as (UUE). That is the day and month are “unknown” and the year is “estimated”.

Example 3: If a person was brought in unconscious to an emergency department of a hospital and the only information available was from a relative who was certain of the age and the birthday's 'month' then the Date accuracy indicator should be informed as (UAA). A year derived from an accurate month and accurate age is always an accurate year.

The Date accuracy indicator can be useful for operational purposes to indicate the level of accuracy of a date that has been collected at any point in time. It can indicate whether the stored date needs to be followed up until it reaches the intended minimal required accuracy. For example, if a person was brought in unconscious to an emergency department of a hospital the level of accuracy of the date collected at that point may not be satisfactory. It is likely that the correct date of birth can be obtained at a later date. The Date accuracy indicator provides information on the accuracy of the entered dates that may require further action.

For future users of the data, it may also be essential to know the accuracy of the date components of a reported date.
