Data Element Concept:	Service provider organisation (address)—building/property name
Value Domain:	Text X[X(29)]

Value domain attributes

Representational attributes

Representation class:	Text
Data type:	String
Format:	X[X(29)]
Maximum character length:	30

Data element attributes

Collection and usage attributes

Guide for use:	Usually this information is not abbreviated. Should include any reference to a wing or other components of a building complex, if applicable. A comma is to be used to separate the wing reference from the rest of the building name. Record each Building/property name relevant to the address: <ul style="list-style-type: none">• Building/property name 1 (30 alphanumeric characters)• Building/property name 2 (30 alphanumeric characters) For example: Building - TREASURY BUILDING Property - BRINDABELLA STATION
----------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------
