Dwelling—date occupied

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 302842

Registration status: Housing assistance, Superseded 30/08/2017

Definition: The date on which a dwelling is occupied by a household under a formal tenancy

agreement.

Context: Used for planning purposes and for calculating turnaround times and rent foregone.

Object Class attributes

Identifying and definitional attributes

Object class: <u>Dwelling</u>

Definition: A structure or a discrete space within a structure intended for people to live in or

where a person or group of people live. Thus a structure that people actually live in is a dwelling regardless of its intended purpose, but a vacant structure is only a dwelling if intended for human residence. A dwelling may include one or more rooms used as an office or workshop provided the dwelling is in residential use.

Context: Dwellings are the main counting unit in the housing sector. Dwellings are reported

for a variety of purposes including number of untenantable or tenantable, and occupied or vacant dwellings. Dwellings may be owned and/or, managed, and/or available for a use by a specific program, including head-leased stock from **private** and **government** sources. A dwelling includes a **boarding house building** and

boarding house units.

Specialisation of: Environmental factors

Collection and usage attributes

Guide for use: Boarding house rooms or beds are not identified as separate dwellings unless

they are self-contained. Self-contained rooms are therefore defined as units and

are counted as a separate dwelling.

For the public rental housing and state owned and managed Indigenous housing data collections, the number of tenancy (rental) units is used as a proxy for counting

the number of dwellings.
