

Person—age, total years N[NN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Age
METEOR identifier:	303794
Registration status:	<ul style="list-style-type: none">• Children and Families, Standard 22/11/2016• Commonwealth Department of Health, Recorded 16/09/2016• Community Services (retired), Standard 29/04/2006• Early Childhood, Standard 21/05/2010• Health, Standard 08/02/2006• Housing assistance, Standard 10/02/2006 [Non Dictionary]• Indigenous, Standard 13/03/2015• National Health Performance Authority (retired), Retired 01/07/2016• Tasmanian Health, Standard 05/09/2016• WA Health, Standard 04/03/2014
Definition:	The age of the person in (completed) years at a specific point in time.
Context:	Age is a core data element in a wide range of social, labour and demographic statistics. It is used in the analyses of service utilisation by age group and can be used as an assistance eligibility criterion.
Data Element Concept:	Person—age

Value domain attributes

Representational attributes

Representation class:	Total				
Data type:	Number				
Format:	N[NN]				
Maximum character length:	3				
Supplementary values:	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>999</td><td>Unknown/not stated</td></tr></tbody></table>	Value	Meaning	999	Unknown/not stated
Value	Meaning				
999	Unknown/not stated				
Unit of measure:	Year				

Data element attributes

Collection and usage attributes

Guide for use:	<p>Age in single years (if aged under one year, record as zero).</p> <p>If age (or date of birth) is unknown or not stated, and cannot be estimated, use Code 999.</p> <p>National community services and housing assistance data dictionary specific:</p> <p>If year of birth is known (but date of birth is not) use the date, 0101YYYY of the birth year to estimate age (where YYYY is the year of birth).</p> <p>National housing assistance data dictionary specific:</p> <p>In the housing assistance data collections age is calculated at 30 June for the corresponding year.</p>
Collection methods:	<p>Although collection of date of birth allows more precise calculation of age, this may not be feasible in some data collections, and alternative questions are: Age last birthday?</p> <p>What was age last birthday?</p> <p>What is age in complete years?</p>
Comments:	<p>National community services data dictionary specific:</p> <p>Different rules for reporting data may apply when estimating the Date of birth of children aged under 2 years since the rapid growth and development of children within this age group means that a child's development can vary considerably over the course of a year. Thus, more specific reporting of estimated age is recommended.</p> <p>Those who need to conduct data collections for children where age is collected in months, weeks, or days should do so in a manner that allows for aggregation of those results to this standard.</p>

Implementation in Data Set Specifications:

[Adoptions DSS 2011-13Community Services \(retired\)](#), Standard 20/05/2013

Implementation start date: 01/07/2011

Implementation end date: 30/06/2013

DSS specific information:

Age in years is collected up to five times: once for the adopted child subject to a finalised adoption; once for the adopted child subject to placement; once for the birth mother; once for the adoptive parent(s); and, once for the adult adopted person (aged 18 years or older) if they lodge an application for information. If age is unknown, use code 999 (unknown/not stated).

When collecting for the adopted child, the age for the child of a 'known' adoption is counted at the date the adoption order was granted. For a local or intercountry adoption, the age of the child is counted at the date of placement with the adopted parent(s).

When collecting for the birth mother, age is at the birth of the child. Ages 48 and above are grouped in the 48+ category.

When collecting for the adoptive parent(s), the age of both the adopted mother and adopted father should be collected if relevant (some adoptions may be by single parents or same sex-couples). The age of the adoptive parent(s) is the age completed in years and is counted at the date of placement of the child. Ages of parent(s) are grouped in the following age ranges: Less than 25; 25-29; 30-34; 35-39; 40-44; 45-49; 50-54, 55+.

When collecting for an adult person who lodged an application for information, age is at the time of application. Ages are grouped in the following age ranges: 18-19; 20-24; 25-34; 35-44; 45+.
