## Person—main language other than English spoken at home, code (ASCL 2005) NN{NN}

#### Identifying and definitional attributes

Metadata item type: Data Element

**Short name:** Main language other than English spoken at home

METEOR identifier: 304133

Registration status: Health, Superseded 13/10/2011

Community Services (retired), Superseded 13/10/2011

Housing assistance, Superseded 30/05/2013

**Definition:** The language reported by a person as the main language other than English

spoken by that person in his/her home (or most recent private residential setting occupied by the person) to communicate with other residents of the home or setting

and regular visitors, as represented by a code.

Data Element Concept: Person—main language other than English spoken at home

Value Domain: Language code (ASCL 2005) NN{NN}

#### Value domain attributes

#### Representational attributes

Classification scheme: Australian Standard Classification of Languages 2005

Representation class: Code

Data type: Number

Format: NN{NN}

Maximum character length: 4

#### Collection and usage attributes

Guide for use: The Australian Standard Classification of Languages (ASCL) has a three-level

hierarchical structure. The most detailed level of the classification consists of base units (languages) which are represented by four-digit codes. The second level of the classification comprises narrow groups of languages (the Narrow Group level), identified by the first two digits. The most general level of the classification consists of broad groups of languages (the Broad Group level) and is identified by the first digit. The classification includes Australian Indigenous languages and sign

languages.

For example, the Lithuanian language has a code of 3102. In this case 3 denote that it is an Eastern European language, while 31 denote that it is a Baltic language. The Pintupi Aboriginal language is coded as 8713. In this case 8 denote that it is an Australian Indigenous language and 87 denote that the language is

Western Desert language.

Language data may be output at the Broad Group level, Narrow Group level or base level of the classification. If necessary significant Languages within a Narrow Group can be presented separately while the remaining Languages in the Narrow Group are aggregated. The same principle can be adopted to highlight significant

Narrow Groups within a Broad Group.

#### Data element attributes

### Collection and usage attributes

Collection methods:	Recommended question:	
	Do you/Does the person/Does (name) speak a language other than English at home? (If more than one language, indicate the one that is spoken most often.)	
	No (English only)	
	Yes, Italian	
	Yes, Greek	
	Yes, Cantonese	
	Yes, Arabic	
	Yes, Mandarin	
	Yes, Vietnamese	
	Yes, Spanish	
	Yes, German	
	Yes, Hindi	
	Yes, Other (please specify)	
	This list reflects the nine most common languages other than English spoken in Australia.	
	Languages may be added or deleted from the above short list to reflect characteristics of the population of interest.	
	Alternatively a tick box for 'English' and an 'Other - please specify' response category could be used.	
Comments:	This metadata item is consistent with that used in the Australian Census of Population and Housing and is recommended for use whenever there is a requirement for comparison with Census data.	
	This data element is important in identifying those people most likely to suffer disadvantage in terms of their ability to access services due to language and/or cultural difficulties. In conjunction with Indigenous status, Proficiency in spoken English and Country of birth this data element forms the minimum core set of cultural and language indicators recommended by the Australian Bureau of Statistics (ABS).	
	Data on main language other than English spoken at home are regarded as an indicator of 'active' ethnicity and also as useful for the study of inter-generational language retention. The availability of such data may help providers of health and community services to effectively target the geographic areas or population groups that need those services. It may be used for the investigation and development of language services such as interpreter/ translation services.
