Data element concept attributes

Collection and usage attributes

Comments:	<p>Family services are to be treated as occasions of service to an individual. A group is defined as two or more patients receiving a service together where all individuals are not members of the same family.</p> <p>In general, establishments other than acute hospitals provide a much more limited range of services for non-admitted patients and outreach/community patients/clients. Therefore, disaggregation by type of non-admitted patient care is not relevant to alcohol and drug hospitals.</p>
