Person—letters of given and family name

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 314127

Registration status: Community Services (retired), Standard 14/09/2009

Health, Superseded 28/04/2016

Definition: A specific combination of letters selected from the person's family name (surname)

and their first name (given name).

Object Class attributes

Identifying and definitional attributes

Object class: Person

Definition: A human being.

Collection and usage attributes

Comments: Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human

being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the *Australian Government Guidelines on the Recognition of Sex and Gender* and the Australian Bureau of Statistics (ABS) *Standard for Sex and Gender Variables*, which recognise that there are sex and gender types that are

not exclusively male or female.
