Service provider organisation—geographic location, code (ASGC 2005) NNNNN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Geographic location of organisation
METEOR identifier:	316965
Registration status:	Community Services (retired) , Superseded 30/11/2006
Definition:	The geographical location of an agency using a five-digit numerical code which indicates the Statistical Local Area (SLA) within the State or Territory of Australia.
Data Element Concept:	Service provider organisation—geographic location
Value Domain:	Geographical location code (ASGC 2005) NNNNN

Value domain attributes

Representational attributes

Classification scheme:	Australian Standard Geographical Classification 2005
Representation class:	Code
Data type:	Number
Format:	NNNNN
Maximum character length:	5

Data element attributes

Collection and usage attributes

Guide for use:	Details on which edition was used in a particular data set should be included in the documentation of metadata accompanying that data set. Coding to ASGC codes is preferably done using the ABS National Localities Index, to map actual address. In some data collections, a compromise has to be made and the ASGC code derived from suburb/town/locality and Postcode-Australian only. However, this solution results in some inaccuracy of information.
----------------	--

The accurate recording of the state or territory is essential.
