DSS type: National Minimum Data Set (NMDS)

Scope: The Commonwealth State/Territory Disability Agreement National Minimum Data Set (CSTDA NMDS) and its national collection is:

- a set of nationally significant data items or pieces of information that are collected in all Australian jurisdictions; and
- an agreed method of collection and transmission.

The purpose of the CSTDA NMDS collection is to facilitate the annual collation of nationally comparable data about CSTDA-funded services, and to obtain reliable, consistent data with minimal load on the disability services field. Under the CSTDA, the Disability Administrators in all Australian jurisdictions are responsible for ensuring 'that CSTDA NMDS information will be comparable across all jurisdictions and years'.

Services within the scope of the collection are those for which funding has been provided, during the specified period, by a government organisation operating under the CSTDA. Therefore, if a service type outlet did not receive CSTDA funding for the 2006–07 collection (i.e. its CSTDA funding dollars for the financial year are zero), then details of this outlet should not be included in the data collection.

A funded agency may receive funding from multiple sources. Where a funded agency is unable to differentiate service users and/or staff according to funding source (i.e. CSTDA or other), they are asked to provide details of all service users and staff (for each service type).

Most agencies funded under the CSTDA are asked to provide information about:

- each of the service types they are funded to provide (i.e. service type outlets they operate);
- all service users who received support over a specified reporting period; and
- the CSTDA NMDS service type(s) the service user received.

The level of information a funded agency is asked to provide varies according to the particular service type (i.e. for each service type outlet).

Where services are provided to groups or families (e.g., 2.02, 2.04, or 2.05), details are only requested about the service user who is eligible for services, not their family or other group members. For example, if a family member/carer receives respite services, only details about the service user (i.e., the person with the disability) are required, not those of the family or carer.

Table 1:

Service type classification	Service type outlet – details required (except for those provided by the jurisdiction)	Service user – details required	Services received by each service user in the reporting period – details required
CSTDA Accommodation support 1.01-1.04, 1.08	All	All	All (except for data items on hours received – Client —amount of assistance, total hours NNN)

CSTDA Accommodation support 1.05-1.07	All	All	All
CSTDA Community support 2.01-2.05	All	All	All (except for data items on hours received – Client—amount of assistance, total hours NNN)
CSTDA Community support 2.06	All	All (except for community development activity within this service type)	All (except for community development activity within this service type)
CSTDA Community support 2.07	All	All	All (except for data items on hours received – Client—amount of assistance, total hours NNN)
CSTDA Community access 3.01, 3.03 Learning and life skills development	All	All	All
CSTDA Community access 3.02 Recreation/holiday programs(a)	All	Linkage key elements only (items 2a–2e)	The following items are optional: Service episode—episode start date; Service event—last service provision date; and Person—service received indicator
CSTDA Respite 4.01-4.05	All	All	All
CSTDA Employment 5.01-5.02	All	All (except for carer—primary status, residency status, age group – items 12b,c,e)	All (except for data items on hours received – Client—amount of assistance, total hours NNN)
CSTDA Advocacy, information and alternative forms of communication 6.01-6.05	All	None	None
CSTDA Other support 7.01-7.04	All (except Service provider organisation—number of clients, total people N(NNNN))	None	None

The data collection is based around the concept of a 'service type outlet', each of which provides only one service type from a discrete location. A funded agency may be funded to provide one or more service types through one or more service type outlets. For example, an agency may be funded under the CSTDA to provide residential accommodation and respite services from one location or funded to provide group homes in three separate locations. A separate service type outlet form is completed for each service type the agency is funded to provide under the CSTDA. If a service user receives more than one service type in the reporting period, a separate service user form is completed for each service type received.

Statistical units:

Service type outlets, service users

Reporting period:

CSTDA-funded agencies are asked to record key information about service users on an ongoing basis, so that they can transmit the required information at the end of each 'reporting period'. Most jurisdictions have set their reporting period (and will therefore ask for information to be transmitted) at the end of each financial year quarter. Some will still only require information to be transmitted at the end of a financial year.

Reference week:

The annual reference week is the 7-day week preceding the end of the financial year (i.e. 24 June to 30 June).

Snapshot day:

Collection of annual snapshot day data is essential to ensure continuity of data interpretation. The snapshot day for each year is generally the last Wednesday in June.

Privacy:

CSTDA NMDS collections conducted in each jurisdiction must comply with Commonwealth privacy legislation and established privacy and data principles.
