Person—body structure, code (ICF 2001) AN[NNNN]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Body structure
Synonymous names:	Body structure code
METEOR identifier:	320147
Registration status:	Community Services (retired) , Standard 16/10/2006 Disability , Standard 13/08/2015 Health , Standard 29/11/2006
Definition:	An anatomical part of a person's body such as organs, limbs or their components, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person—body structure
METEOR identifier:	320246
Registration status:	Community Services (retired) , Standard 16/10/2006 Disability , Standard 13/08/2015 Health , Standard 29/11/2006
Definition:	An anatomical part of a person's body such as organs, limbs or their components.
Object class:	Person
Property:	Body structure

Value domain attributes

Identifying and definitional attributes

Value domain:	Body structure code (ICF 2001) AN[NNNN]
METEOR identifier:	320644
Registration status:	Community Services (retired) , Standard 16/10/2006 Disability , Standard 13/08/2015 Health , Standard 29/11/2006
Definition:	A code set representing the Body Structures component of the International Classification of Functioning, Disability and Health (ICF 2001).
Context:	Human functioning and disability.

Representational attributes

Classification scheme:	International Classification of Functioning, Disability and Health 2001
Representation class:	Code
Data type:	String
Format:	AN[NNNN]
Maximum character length:	6

Collection and usage attributes

Guide for use: This metadata item contributes to the definition of the concept [disability](#) and gives an indication of the experience of disability for a person.

Data can be collected at the three digit level in one chapter and at the chapter level in another. However it is only possible to collect data at a single level of the hierarchy in a single chapter to maintain mutual exclusivity. For example, it is not permitted to collect both 'Skin and related structures' (chapter level) and 'Structure of nails' (3 digit level) as the former includes the latter.

The value domain below refers to the highest hierarchical level (ICF chapter level). Data collected at this level, in association with respective qualifiers (*Impairment extent code N, Impairment nature code N, Impairment location code N*) will use the codes as indicated.

CODE s1	Structures of the nervous system
CODE s2	The eye, ear and related structures
CODE s3	Structures involved in voice and speech
CODE s4	Structures of the cardiovascular, immunological and respiratory systems
CODE s5	Structures related to the digestive, metabolic and endocrine systems
CODE s6	Structures related to the genitourinary and reproductive systems
CODE s7	Structures related to movement
CODE s8	Skin and related structures

Data collected at this level will provide a general description of the structures and can only be compared with data collected at the same level.

Each chapter contains categories at different levels ordered from general to detailed. For more detailed information the user should follow the structure of the ICF; the codes should be drawn from the same hierarchical level within any particular chapter. The full range of permissible values together with definitions is listed in the [Body Structures](#) component of the ICF.

An example of a value domain at the 3 digit level from the Structures of the nervous system chapter may include:

CODE s110	Structure of the brain
CODE s120	Spinal cord and related structures
CODE s130	Structure of the meninges
CODE s140	Structure of sympathetic nervous system
CODE s150	Structure of parasympathetic nervous system
CODE s198	Structure of the nervous system, other specified
CODE s199	Structure of the nervous system, unspecified

An example of a value domain at the 4 digit level from the Structures related to movement chapter may include:

CODE s7300	Structure of upper arm
CODE s7301	Structure of forearm
CODE s7302	Structure of hand
CODE s7500	Structure of thigh
CODE s7501	Structure of lower leg
CODE s7502	Structure of ankle and foot
CODE s7600	Structure of vertebral column

The prefix **s** denotes the domains within the component of *Body Structures*.

Data element attributes

Collection and usage attributes

Guide for use: This data element consists of a single, neutral list of body structures that can be used to record positive or neutral body function. In conjunction with *Impairment extent code N*, it enables the provision of information about the presence and extent of impairment for any given body structures; with *Impairment nature code N*, the provision of information about the nature of the impairment for given body functions; and *Impairment location code N*, the location of the impairment for given body functions.

Where multiple body structures or [impairments of body structures](#) are recorded, the following prioritising system should be useful:

- The first recorded body structure or impairment of body function is the one having the greatest impact on the individual.
- Second and subsequent body structure or impairment of body function is also of relevance to the individual.
