

Activities and participation code (ICF 2001) AN[NNN]

Identifying and definitional attributes

Metadata item type:	Value Domain
Synonymous names:	Activities and participation domains
METEOR identifier:	320669
Registration status:	<ul style="list-style-type: none">• Community Services (retired), Standard 16/10/2006• Disability, Standard 13/08/2015• Health, Standard 29/11/2006
Definition:	A code set representing the <i>Activities and Participation</i> component of the International Classification of Functioning, Disability and Health (ICF 2001).
Context:	Human functioning and disability.

Representational attributes

Classification scheme:	International Classification of Functioning, Disability and Health 2001
Representation class:	Code
Data type:	String
Format:	AN[NNN]
Maximum character length:	5

Collection and usage attributes

Guide for use:

This metadata item contributes to the definition of the concept '[Disability](#)' and gives an indication of the experience of disability for a person.

The activities and participation codes are a neutral list that covers the full range of life areas in which a person can be involved. The domains can be used to record positive or neutral experience of functioning as well as limitations and restrictions.

Data can be collected at the three digit level in one chapter and at the chapter level in another. However it is only possible to collect data at a single level of the hierarchy in a single chapter to maintain mutual exclusivity. For example, it is not permitted to collect both 'Self care' (chapter level) and 'Looking after one's health' (3 digit level) as the former includes the latter.

The value domain below refers to the highest hierarchical level (ICF chapter level). Data collected at this level, in association with respective qualifiers (Activity difficulty level, Activity Need for assistance, Participation extent and Participation satisfaction level) will use the codes as indicated.

CODE d1 Learning and applying knowledge
CODE d2 General tasks and demands
CODE d3 Communication
CODE d4 Mobility
CODE d5 Self-care
CODE d6 Domestic life
CODE d7 Interpersonal interactions and relationships
CODE d8 Major life areas
CODE d9 Community, social and civic life

Data collected at this level will provide a general description of functioning for the person and can only be compared with data collected at the same level.

Each chapter contains categories at different levels ordered from general to detailed. For specific more detailed information the user should follow the structure of the ICF; the codes should be drawn from the same hierarchical level within any particular chapter. The full range of permissible values is listed in the [Activities](#) and [Participation](#) component of the ICF.

An example of a value domain at the 3 digit level from the Self-care chapter may include:

CODE d510 Washing oneself
CODE d520 Caring for body parts
CODE d530 Toileting
CODE d540 Dressing
CODE d550 Eating
CODE d560 Drinking
CODE d570 Looking after one's health

An example of value domains at the 4 digit level from the Mobility chapter may include:

CODE d4600 Moving around within the home
CODE d4601 Moving around within buildings other than home
CODE d4602 Moving around outside the home and other buildings
CODE d4701 Using private motorized transportation
CODE d4702 Using public motorized transportation

The prefix **d** denotes the domains within the component of *Activities and Participation*. At the user's discretion, the prefix **d** can be replaced by **a** or **p**, to denote activities or participation respectively.
