Person—blood pressure (systolic invasive), millimetres of mercury NN[N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Blood pressure (systolic invasive)
METEOR identifier:	320899
Registration status:	Health , Recorded 14/07/2006
Definition:	A person's systolic blood pressure , measured invasively in millimetres of mercury.
Data Element Concept:	Person—blood pressure (systolic)
Value Domain:	Millimetres of mercury NN[N]

Value domain attributes

Representational attributes

Representation class:	Total	
Data type:	Number	
Format:	NN[N]	
Maximum character length:	3	
	Value	Meaning
Supplementary values:	999	Not stated/inadequately described
Unit of measure:	Millimetre of mercury (mmHg)	

Data element attributes

Collection and usage attributes

Guide for use:	For recording the systolic reading, use phase I Korotkoff (the first appearance of sound). If Blood pressure - systolic is not collected or not able to be collected, code 999. Values measured by invasive/automated methods i.e intra arterial catheter, should be recorded in preference to those values collected by the non invasive methods.
