Person—acute coronary syndrome symptoms onset date, DDMMYYYY

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Date of onset of acute coronary syndrome symptoms
Synonymous names:	Date of onset of ACS symptoms
METEOR identifier:	321201
Registration status:	Health , Standard 01/10/2008
Definition:	The date on which a person experienced acute coronary syndrome symptoms that prompted the person to seek medical attention, either at the hospital or from a general practitioner.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person—acute coronary syndrome symptoms onset date
METEOR identifier:	321195
Registration status:	Health , Standard 01/10/2008
Definition:	The date on which a person experienced symptoms for acute coronary syndrome that prompted the person to seek medical attention, either at the hospital or from a general practitioner.
Object class:	Person
Property:	Acute coronary syndrome symptoms onset date

Value domain attributes

Identifying and definitional attributes

Value domain:	Date DDMMYYYY
METEOR identifier:	270566
Registration status:	Aged Care , Standard 30/06/2023 Australian Institute of Health and Welfare , Recorded 09/08/2023 Australian Teacher Workforce Data Oversight Board , Standard 30/08/2022 Children and Families , Standard 22/11/2016 Commonwealth Department of Health , Retired 19/10/2023 Community Services (retired) , Standard 01/03/2005 Disability , Standard 07/10/2014 Early Childhood , Standard 21/05/2010 Health , Standard 01/03/2005 Homelessness , Standard 23/08/2010 Housing assistance , Standard 01/03/2005 Independent Hospital Pricing Authority , Standard 31/10/2012 Indigenous , Standard 11/08/2014 National Health Performance Authority (retired) , Retired 01/07/2016 Tasmanian Health , Standard 31/08/2016 WA Health , Standard 06/03/2014 Youth Justice , Standard 15/02/2022
Definition:	The day of a particular month and year.

Representational attributes

Representation class: Date
Data type: Date/Time
Format: DDMMYYYY
Maximum character length: 8

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: Acute coronary syndrome symptoms may include:

- tightness, pressure, heaviness, fullness or squeezing in the chest which may spread to the neck and throat, jaw, shoulders, the back, upper abdomen, either or both arms and even into the wrist and hands
- dyspnoea, nausea/vomiting, cold sweat or syncope.

Seeking medical attention could include the person presenting to their GP who then refers them to hospital or the person presenting directly to hospital (via ambulance or own form of transport).

If the person is already a patient at the hospital for another reason then the date would be when they advised hospital staff of their symptoms.

Collection methods: Record the date that the person identifies as being when the most significant acute coronary syndrome symptom/s occurred that prompted them to seek medical attention.
