- Representation of dates and times

Data element attributes

Collection and usage attributes

Guide for use: Each emergency department stay should include a non-admitted patient

emergency department service episode component. The value of the episode end status code should guide the selection of the value to be recorded in this field:

- If the patient is subsequently admitted then record the time the patient leaves
 the Emergency Department to go to the admitted patient facility. Physically
 moving the patient to a bed in an emergency department specialist care unit
 (including EMU, short stay ward, emergency care unit or observation unit) is
 defined as representing departure from the emergency department.
- If the service episode is completed without the patient being admitted, including referral to another hospital, record the time the patient leaves the Emergency Department.
- If the patient did not wait record the time the patient leaves the Emergency Department or was first noticed as having left.
- If the patient left at their own risk record the time the patient leaves the Emergency Department.
- If the patient died in the Emergency Department record the time of death.
- If the patient was dead on arrival then record the time of presentation at the Emergency Department.

Collection methods: Collected in conjunction with emergency department stay physical departure date.

Comments: This data element has been developed for the purpose of State and Territory

compliance with the Australian Health Care Agreement and the agreed national

access performance indicator.
