Identifying and definitional attributes

Data element concept:	Service episode—type of goods and equipment received
METEOR identifier:	269799
Registration status:	Community Services (retired) , Standard 01/03/2005
Definition:	The types of goods or equipment received by the client (by purchase, loan, or gift) during a service episode.
Context:	<p>Resource and financial planning:</p> <p>This provides one measure of the assistance received by a client or clients on a Service episode. In this case it will measure the types of goods and equipment received.</p> <p>This metadata item does not record an amount of assistance with goods and equipment in the same way that an amount is recorded for the other types of assistance provided by agencies (i.e. in time, quantity or cost). Rather this metadata item indicates the type of goods or equipment that the agency provides to the person on an occasion of service delivery.</p> <p>Information about the types of goods and equipment provided to clients by agencies facilitates interstate and cross regional comparisons of service provision and comparisons between different client sub-populations.</p>
Object class:	Service episode

Data element attributes

Collection and usage attributes

Collection methods: The agency should record the type of goods or equipment received by the client (on loan or by purchase) on each instance of assistance. This information can then be amalgamated to provide a measure of the types of goods and equipment received by a client over a reporting period (which will vary according to collection requirements).

Where the client receives more than one of the same type of good or equipment (e.g. several food packets) on the same occasion, the agency should only record this once. Where the client receives different types of goods or equipment on the same occasion, the agency should separately record each type of goods or equipment against the same date.
