Definition:	<p>The process by which an episode of care for an admitted patient ceases.</p> <p>A separation may be formal or statistical.</p> <p>Formal separation:</p> <p>The administrative process by which a hospital records the cessation of treatment and/or care and/or accommodation of a patient.</p> <p>Statistical separation:</p> <p>The administrative process by which a hospital records the cessation of an episode of care for a patient within the one hospital stay.</p>
Context:	Admitted patient care.

Collection and usage attributes

Comments:	<p>This treatment and/or care provided to a patient prior to separation occurs over a period of time and can occur in hospital and/or in the person's home (for hospital-in-the-home patients).</p> <p>While this concept is also applicable to non-admitted patient care and welfare services, different terminology to 'separation' is often used in these other care settings.</p>
