# Impairment of body function

## Identifying and definitional attributes

<b>Metadata item type:</b>	Glossary Item
<b>METEOR identifier:</b>	327290
<b>Registration status:</b>	<a href="#">Community Services (retired)</a> , Standard 16/10/2006 <a href="#">Health</a> , Standard 29/11/2006
<b>Definition:</b>	Impairments of body function are problems in body function such as a loss or significant departure from population standards or averages.
<b>Context:</b>	Body functions are classified in neutral terms. To indicate that there is a problem with a body function requires the use of the impairment extent code to denote the extent or magnitude of the problem together with the body functions code.

## Collection and usage attributes

<b>Comments:</b>	<p>This glossary term is based on the International Classification of Functioning, Disability and Health (ICF). The ICF was endorsed by the World Health Assembly in 2001 as a reference member of the WHO Family of International Classifications and of the Australian Family of Health and Related Classifications (endorsed by the National Health Information Management Group in 2002).</p> <p>The ICF provides a framework for the description of human functioning and disability. The components of ICF are defined in relation to a health condition. A health condition is an 'umbrella term for disease (acute or chronic), disorder, injury or trauma' (WHO 2001). A health condition may be recorded, for example, as Episode of care principal diagnosis, code (ICD-10-AM 3rd Ed) ANN{.N[N]} and Episode of care additional diagnosis, code (ICD-10-AM 3rd Ed) ANN{.N[N]}.</p>
