Definition:	The date on which the reserve was first placed against a medical indemnity claim, expressed as DDMMYYYY.
Data Element Concept:	Medical indemnity claim management episode—reserve placement date
Value Domain:	Date DDMMYYYY

Value domain attributes

Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
---------------------------------	--

Data element attributes

Collection and usage attributes

Guide for use:	<p>The reserve placement date must be the same as or after the date the health-care incident occurred.</p> <p>The reserve may be adjusted during the lifetime of a claim. However, the date(s) when the reserve was adjusted should not be reported.</p> <p>This data element should be used in conjunction with the data element: <i>Date—accuracy indicator, code AAA</i> to flag whether each component in the date is accurate, estimated or unknown.</p>
Comments:	<p>This date is of particular significance in the context of the Medical Indemnity National Collection (MINC) as the placing of a reserve against a matter indicates when it was considered likely to materialise in a medical indemnity claim and so is required to have occurred for a claim to be reported to the MINC.</p>
