Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
---------------------------------	--

Data element attributes

Collection and usage attributes

Guide for use:	<p>This item should be recorded as the date a decision was made regarding the service response required by the department.</p> <p>This data element should always be recorded as an 8-digit valid date comprising day, month and year. Year should always be recorded in its full 4-digit format. For day and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example, if the contact assessment decision was made on 1 July 2004, the date should be recorded as 01072004.</p> <p>If the date is unknown, the date 01011900 should be provided.</p>
Comments:	<p>This is important to measure the length of time between when the decision regarding the level of involvement of the department was made and the commencement of the investigation. It is also used to measure the length of time of the investigation and also the time elapsed from contact to the contact assessment decision.</p>
