Person—congenital malformation, code (ICD-10-AM 4th edn) ANN{.N[N]}

Exported from METEOR (AIHW's Metadata Online Registry)

Person—congenital malformation, code (ICD-10-AM 4th edn) ANN{.N[N]}

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Congenital malformations
METEOR identifier:	333932
Registration status:	[Health](), Superseded 07/12/2005
Definition:	Structural abnormalities (including deformations) that are present at birth and diagnosed prior to **separation** from care, as represented by an ICD-10-AM code.
Context:	Admitted patient care
Data Element Concept:	[Person—congenital malformation]()
Value Domain:	[Congenital malformations code (ICD-10-AM 4th edn) ANN{.N[N]}]()

Value domain attributes

Representational attributes

Classification scheme:	[International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification 4th edition]()
Representation class:	Code
Data type:	String
Format:	ANN{.N[N]}
Maximum character length:	6

Source and reference attributes

Origin:	International Classification of Diseases - 10th Revision, Australian Modification (4th Edition 2004) National Centre for Classification in Health, Sydney.

Data element attributes

Collection and usage attributes

Guide for use:	Coding to the disease classification of ICD-10-AM is the preferred method of coding admitted patients. However, for the perinatal data collection, the use of BPA is preferred as this is more detailed (see the metadata item Person—congenital malformations, code (BPA 1979) ANN.N[N]).
Comments:	Required to monitor trends in the reported incidence of congenital malformations, to detect new drug and environmental teratogens, to analyse possible causes in epidemiological studies, and to determine survival rates and the utilisation of paediatric services.

Source and reference attributes

Submitting organisation:	National Perinatal Data Development Committee
