Service episode—episode start date, DDMMYYYY

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Episode start date
Synonymous names:	Service start date; Entry date; Support period start date; Date of effect; Date of entry; Order start date; Detention start date
METEOR identifier:	338558
Registration status:	Community Services (retired) , Standard 16/05/2006 Disability , Superseded 05/07/2019 Homelessness , Superseded 10/08/2018 Housing assistance , Standard 23/08/2010
Definition:	The date on which a service episode commenced.
Data Element Concept:	Service episode—episode start date
Value Domain:	Date DDMMYYYY

Value domain attributes

Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
---------------------------------	--

Data element attributes

Collection and usage attributes

Guide for use:	Due to the considerable variation in the types of services provided in the community services sector, it is not possible at this stage to define in generic terms what will constitute commencement of a service episode. Individual collections should however define what constitutes commencement for their own purposes. For example, it may be at contact stage in some instances or in others when a case plan is formulated.
Collection methods:	Date assistance commenced must be related to a particular service episode. For each separate service episode a separate 'Service episode—start date, DDMMYYYY' should be recorded.
Comments:	This metadata item is used in calculation of measures of periods of support and duration of assistance.

Implementation in Data Set Specifications:

[Child protection and support services \(CPSS\) - out-of-home care NMDS \(July 2007\)](#)

[Community Services \(retired\)](#), Superseded 01/05/2008

DSS specific information:

This date is to be entered each time a child starts a placement. This may be the child's first placement or a change of placement.

This metadata item is used to determine the length of time in specific out-of-home placements, out-of-home care as a whole and also the number of different carers a child has.

Entered care is defined as when a child physically moves into a placement and this is supported by the child protection service. Alternatively, if the child is already living in the place of residence, it is when the child protection authority deems it to be an out-of-home care placement.

If the date is unknown, the date 01011900 should be provided.

[Child protection and support services \(CPSS\) - out-of-home care NMDS pilot \(2008\)](#)

[Community Services \(retired\)](#), Retired 06/02/2012

[Child protection and support services \(CPSS\) - care and protection order episode NMDS \(July 2007\)](#)

[Community Services \(retired\)](#), Superseded 01/05/2008

DSS specific information:

An entry date should be recorded for each separate care and protection order episode of the child.

A new episode will begin and an entry date will be recorded in the following circumstances:

A child is placed on a care and protection order for the first time in their life.
A child is placed on a higher level order than the one they are currently on.
The higher level order expires and the child is placed on a lower level order. This date will be recorded once the higher level order expires.
A child moves from one jurisdiction to another and the order is transferred to the second jurisdiction.
In some circumstances, the entry date will be the same as the exit date from a previous episode, e.g. when a child moves directly from one level order to a different level order.

This data item delineates a care and protection order episode and is qualified by reason for entry.

If the date is unknown, the date 01011900 should be provided.

[Commonwealth State/Territory Disability Agreement NMDS - 1 July 2006](#)

[Community Services \(retired\)](#), Superseded 14/12/2008

DSS specific information:

A service is a support activity delivered to a person, in accord with the CSTDA. Services within the scope of the collection are those for which funding has been provided, during the specified period, by a government organisation operating under the CSTDA.

A service user is considered to have started receiving a CSTDA-funded service type once they have been judged as eligible for the service type and have actually received support within that service type. Support may include assessment processes once the service user has been accepted as eligible for the service type. However it does not include assessment where assessment is for eligibility or for a place on a waiting list. Support does not generally include requests for information or phone queries.

At times, an outlet may only provide the service user with one-off assistance. For example, a service user may only require respite care on one occasion. Where this assistance is CSTDA-funded, the general rule is that all service users details should be recorded as required for that service type. If the service user is not expected to use the service outlet again, an exit date and appropriate main reason for service cessation should be reported.

If a service user formally exits a service and then 're-enters' a service, an exit date should be reported and a new service start date should be reported.

Service users who commence services after 1 October 2002, should have their actual commencement date recorded (i.e. the date this service type was first received by the service user from the service type outlet).

Existing service users (i.e. those who commenced services prior to October 2002), should either be recorded as commencing the service type on:

- their known service start date, for example, a service user starting on 2 September 2002 may be recorded as 02092002;
- an estimate of their service start date by recording '0101' for the day and month and estimating the year. For example, if a service user has been receiving support from a service type outlet for about 5 years, the outlet would record the Service start date as 01011997'; or
- on 1 October 2002 (i.e. 01102002). This option is used if the start date is unknown or cannot be recorded for some other reason.

Start date, in conjunction with last service provision date, or exit date, gives some indication of length of stay of service users in the CSTDA program and of the intensity of service provision. In conjunction with the data element exit date, it can also be used to identify the number of CSTDA-funded service users as at the end of the CSTDA NMDS reporting period, and at any time.

[Commonwealth State/Territory Disability Agreement NMDS \(July 2008\)](#)

- on 1 October 2002 (i.e. 01102002). This option is used if the start date is unknown or cannot be recorded for some other reason.

The service episode start date must relate to the service type outlet ID ([Service type outlet—outlet identifier, XX\[X\(26\)\]](#)) and associated service type ([Service type outlet—service activity type, NDA service type code N.NN](#)).

If a service user formally exits a service and then 're-enters' a service at a later date, a new period of service should be reported.

[Home and Community Care MDS 2009](#)
[Community Services \(retired\)](#), Recorded 16/11/2009

Implementation start date: 11/05/2006

DSS specific information:

The date on which a period of delivery of HACC-funded assistance to the person begins.

Date of entry (in conjunction with Date of exit) gives some indication of length of stay of clients in the HACC program and of the intensity of service provision. The data element Date of entry also locates information about the client's Source of referral in time. In conjunction with the data element Date of exit, it can also be used to identify the number of HACC clients at the end of the HACC MDS reporting period.

Future developments in HACC MDS reporting may require HACC agencies to report on the services received by their clients within each HACC service episode rather than within the HACC MDS reporting period. Thus, this data element is likely to have extended uses in the future.

Valid date

This data element should always be recorded as an 8-digit valid date comprising

day, month, and year. Year should always be recorded in its full 4-digit format. For days and months with a numeric value of less than 10, agencies should use zeros to ensure that the date contains the required 8-digits. For example, for a person who received their first HACC-funded assistance from the agency on July 1, 2005 the Date of entry should be recorded as 01/07/2005.

Generally, the Date of entry is the earliest date on which the care recipient or carer received services for the current service episode. Report as follows:

For on-going clients, there is no need to re-enter the date, the system will use the existing Date of entry.

For new clients in the reporting period, report the first Assistance received date

For clients who exited from a service episode and entered a new service episode during the same reporting period, report the Assistance received date for the new service episode.

For any client whose assistance from the agency is fully-funded through the HACC program, the Date of entry is the first date on which the person received from the agency any of the types of assistance listed under the data element Type of assistance/support, within a HACC service episode. For any client whose assistance from the agency is not fully funded through the HACC program (i.e. funded in part from a source other than the HACC program), the Date of entry is the first date on which the assistance they received from the agency, within the HACC Service Episode, was funded by the HACC program, i.e. the Date of entry will be the same date as the first HACC-funded Assistance received date recorded.

At times, an agency may only provide the client with one-off assistance. For example, a client may only require assistance with minor home maintenance that is provided on one day. Alternatively, a client may have only received an assessment from an agency but has not gone on to receive any further assistance. In these circumstances (and provided the client is not receiving other on-going services), the Date of entry will be the same as the Date of exit. Furthermore, both dates will be the same as the Assistance received date recorded by the agency for that HACC service event. Despite being the same date, the agency should record the date in every relevant role that it plays in relation to the client's involvement with the agency (e.g. Date of entry, Date of exit, Assistance received date).

Reporting requirements:

This data element is required for reporting in the HACC MDS collection. Over a period of time a client may have entered and exited an agency on more than one occasion. Agencies are required to report the latest Date of entry into HACC service episode that the agency has recorded for the client.

The data element Source of referral will be analysed in conjunction with the data element Date of entry. The agency should ensure that the Source of referral reported for the client relates to the beginning of the same HACC service episode as the Date of entry reported for the client.

[Juvenile Justice Detention file cluster](#)

[Community Services \(retired\)](#), Standard 14/09/2009

Implementation start date: 24/09/2009

DSS specific information:

Guide for use - Detention file

A detention period is the period spent in a particular detention centre for a particular type of detention (pre-court detention, pre-sentence detention, sentenced detention). A detention period starts when:

- the young person is received into detention
- the young person is transferred to another detention centre
- the young person is transferred to the custody of another jurisdiction (e.g. adult corrective services, police custody, interstate)
- the type of detention changes (pre-court detention, pre-sentence detention, sentenced detention)
- the young person returns to detention following an escape or abscond.

Detention periods may be concurrent where the detention types are different; that is, the detention start date may be before the detention end date of the previous order. For example, a young person's period of sentenced detention begins 1 January and ends 1 June. On 1 February, they are placed on remand (pre-sentence detention) until 10 February. There are two detention periods, a period of sentenced detention from 1 January to 1 June and a period of pre-sentence detention from 1 February to 10 February.

Detention periods cannot be concurrent where the detention types are the same. If the young person in the example above is placed in sentenced detention following the end of period of remand on 10 February, this is included in the first period of sentenced detention.

Person identifier	Detention start date	Detention end date	Detention type	Comment
1	01/01/08	01/06/08	3 (sentenced detention)	May relate to multiple sentenced detention orders.
1	01/02/08	10/02/08	2 (pre-sentence detention)	Period of remand that begins and ends within period of sentenced detention.
1	01/08/08	01/12/08	3 (sentenced detention)	New period of sentenced detention.

[Juvenile Justice NMDS 2007](#)

[Community Services \(retired\)](#), Superseded 19/05/2010

Implementation start date: 01/07/2005

DSS specific information:

For the purposes of the Juvenile Justice NMDS, the episode's 'start date' is the 'entry date'-the date on which the client comes under the supervision or case management of the juvenile justice department under a specific legal arrangement or where there is a change in the type of supervision provided and/or the specific juvenile justice agency responsible.

A new episode will begin and an entry date recorded in the following circumstances:

- On admission of the client to a specific period of supervision or case management by the juvenile justice department, under one of the types of intervention listed in the data domain of juvenile justice episode type;
- If, for an existing client, there is a change in juvenile justice episode type, such as from police custody to remand, supervised bail to remand, remand to detention, detention to parole, probation to community service;
- If, for an existing client, another juvenile justice episode type which is ranked more highly on the ranking scale outlined below, begins;
- If a client on a custodial order (remand or detention) is transferred to a different place of custody within a jurisdiction (for example from a detention centre in Sydney to one in Wagga);
- If a client is transferred from the adult justice system to the juvenile justice system;
- If a client is transferred into the State or Territory from another jurisdiction;
- If a client has returned from escape after an absence of 2 days or more.

A person can be recorded as being on only ONE juvenile justice episode at any point in time (i.e. they cannot have concurrent juvenile justice episodes). Therefore an Entry date must be followed by an Exit date for that episode, before another Entry date can be recorded. If a client is on 2 or more orders at a particular time in a jurisdiction, then the one considered the most serious should be recorded in the juvenile justice NMDS (with ranking as described in the juvenile justice episode data concept, with 1 being most serious and 12 being least serious).

If a client on a juvenile justice episode receives another order that is more highly ranked than the order for the original episode, then that original episode should be ended (and an Exit date recorded as the date the new more highly ranked type of order began). A new episode should be commenced (with an Entry date recorded as the date the new more highly ranked order began). The juvenile justice episode type of the second episode will be that of the more highly ranked type of order.

If the second order is of a lower ranking there will be no change in episode and no Exit date or Entry date recorded at the time the new order commences.

However, if the first order is completed by the juvenile, and the second order still applies and is the highest ranked order that is current at the time, then it should be recorded at that point. The Exit date for the second more highly ranked order will be when the client has been deemed to have completed the order. The Entry date for the lower ranked order will be the same date as the Exit date from the higher order, as that is the date when it becomes the most highly ranked order applying to the juvenile.

Approved leave does not constitute a discharge or new admission and so no entry date should be recorded on return from leave.

Escape or abscond, if the juvenile is absent for less than 2 days, does not constitute a discharge or new admission and so no entry date should be recorded on return (unless there is a change in the juvenile justice episode type on his or her return).

A return to court does not necessarily signal the beginning of a new episode. If there is no change in juvenile justice episode type of the client, or (if on a custodial intervention) in their place of custody, then a return to court will not constitute a discharge and new episode. For example, a youth on remand may return to court several times (for hearings, outcome, sentencing etc). During this time the type of intervention has not changed or the place of remand. In this case the returns to court would not constitute the beginning of a new episode. However, under this scenario, if the court changed the place of remand of the juvenile, then this would constitute a new episode. If the juvenile is found guilty the commencement of the sentence imposed by the court would also mark the beginning of an episode.

[Juvenile Justice Order file cluster](#)

[Community Services \(retired\)](#), Standard 14/09/2009

Implementation start date: 24/09/2009

DSS specific information:

Guide for use - Order file

This date may not be the date that supervision began; for example, if a sentence of

detention is backdated to the start of the young person's remand period, the order start date will be before the period of sentenced detention actually began.

Orders may be concurrent and overlap; that is, the Episode start date or Order start date may be before the Order end date of the previous order.
