# Service provider organisation—number of escapes (Juvenile Justice), total N[NN]

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Number of escapes (Juvenile Justice)
<b>Synonymous names:</b>	Escapes from secure perimeter; Escapes from legal custody.
<b>METEOR identifier:</b>	342792
<b>Registration status:</b>	<a href="#">Community Services (retired)</a> , Superseded 14/09/2009 [Non Dictionary]
<b>Definition:</b>	The total number of successful incidences of escape from the agency or organisation.
<b>Data Element Concept:</b>	<a href="#">Service provider organisation—number of escapes</a>
<b>Value Domain:</b>	<a href="#">Total escapes N[NN]</a>

## Value domain attributes

## Representational attributes

<b>Representation class:</b>	Total
<b>Data type:</b>	Number
<b>Format:</b>	N[NN]
<b>Maximum character length:</b>	3
<b>Proposed unit of measure:</b>	Escapes

## Data element attributes

## Collection and usage attributes

<b>Guide for use:</b>	This data standard should count the total number of successful escapes in a set 12 month period. This is a count of the number of individuals involved in an incident of escape. For example, if three people escape in one incident, this will be counted as three. In addition, if an individual escapes multiple times, they should be counted for each escape.
<b>Collection methods:</b>	<p>This data standard is implemented two times in the Juvenile Justice NMDS. It is collected for the following items:</p> <p>Number of escapes from secure perimeter</p> <ul style="list-style-type: none"><li>• the total number of successful escapes from within a secure perimeter of a remand/detention centre by clients who are under the supervision of the centre;</li></ul> <p>Note: escapes whilst on leave or whilst in transportation should not be included in this count.</p> <p>Number of escapes from other legal custody</p> <ul style="list-style-type: none"><li>• the total number of successful escapes from legal custody (other than from within the secure perimeter of a remand/detention centre) by clients who are under direct, physical supervision of the centre.</li></ul> <p>Note: escapes whilst on escorted leave should be included.</p>
<b>Comments:</b>	Escapes are of interest to jurisdictions as one possible indicator of the effectiveness of centres.
