## Data element attributes

### Collection and usage attributes

<b>Guide for use:</b>	A person may be prescribed one or more type of medication for acute coronary syndromes. Therefore more than one code may be recorded.
<b>Collection methods:</b>	This information should be recorded at the end of the person's hospital stay involving the treatment of acute coronary syndromes.
<b>Comments:</b>	<p>The purpose of this data element is to collect information on the prescription of pharmacotherapy recommended for the treatment of acute coronary syndromes in the national guidelines. Additional information on the specific drug types prescribed is not required for this quality purpose.</p> <p>The health service may choose to collect additional information on the specific drug types prescribed within each of the core pharmacotherapies.</p>
