| 99                               | Not stated/inadequately described  |       |         |    |                                   |

## Data element attributes

### Collection and usage attributes

**Guide for use:** The number of lesions successfully dilated should be recorded for each percutaneous coronary intervention (PCI) performed.

Successful dilation is where:

- residual stenosis is less than 10% following coronary stenting; OR
- residual stenosis is less than 50% after balloon angioplasty alone.

The value '99' is not for use in primary data collections.

**Collection methods:** The number of lesions successfully dilated should be recorded from the angioplasty report.

### Relational attributes

**Implementation in Data Set Specifications:** [Coronary artery cluster](#)  
[Health](#), Standard 01/10/2008

**Conditional obligation:** Record when a percutaneous coronary intervention is performed.
