Functional stress test intensity code N

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	344441
Registration status:	Health , Standard 01/10/2008
Definition:	A code set representing the intensity of the functional stress test.

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Maximal (symptom limited)
	2	Submaximal
	3	Rest / distribution study
Supplementary values:	9	Not stated/inadequately described

Collection and usage attributes

Guide for use:	CODE 1 Maximal (symptom limited)
	Use this code when the intensity of the stress test is to increase the person's heart rate with the exercise to 85-90% of their predicted maximum heart rate.
	CODE 2 Submaximal
	Use this code when the intensity of the stress test is limited to increasing the person's heart rate with the exercise to 120 beats per minute or 70% of their predicted maximum heart rate.
	CODE 3 Rest/distribution study
	Use this code when a Thallium (nuclear) study has been undertaken for the assessment of viability, where no exercise or pharmacologic stress component has been undertaken
	CODE 9 Not stated/inadequately described
	Not for use in primary data collections.
