Ventricular ejection fraction cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	351881
Registration status:	Health , Standard 01/10/2008
DSS type:	Data Element Cluster
Scope:	The ventricular ejection fraction is the fraction of blood pumped out of a ventricle with each heart beat. Impaired ventricular ejection fraction can be indicative of damage to the heart muscle, such as that sustained during myocardial infarction. The ventricular ejection fraction cluster collects information on the timing, measurement type and results of a ventricular ejection fraction measurement during the current hospital presentation.

Source and reference attributes

Implementation in Data Set Specifications:	Acute coronary syndrome (clinical) DSS Health , Superseded 01/09/2012
	Acute coronary syndrome (clinical) DSS Health , Superseded 02/05/2013
	Acute coronary syndrome (clinical) NBPDS 2013- Health , Standard 02/05/2013
	Implementation start date: 01/07/2013

Metadata items in this Data Set Specification

Seq No.	Metadata item	Obligation	Max occurs
-	Person—ventricular ejection fraction test performed indicator, yes/no code N	Mandatory	1
-	Ventricular ejection fraction test—test date, DDMMYYYY	Conditional	1
	Conditional obligation: To be provided when the ventricular ejection fraction is measured.		
-	Ventricular ejection fraction test—test time, hhmm	Conditional	1
	Conditional obligation: To be provided when the ventricular ejection fraction is measured.		
-	Ventricular ejection fraction test—test type, code N	Conditional	1
	Conditional obligation: To be provided when the ventricular ejection fraction is measured.		
-	Ventricular ejection fraction—test result, code N	Conditional	1
	Conditional obligation: To be provided when the ventricular ejection fraction is measured.		
-	Ventricular ejection fraction—test result, percentage N[N].N	Conditional	1
	Conditional obligation: To be provided when the ventricular ejection fraction is measured.
