# Person—revascularisation percutaneous coronary intervention date, DDMMYYYY

## Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Date of revascularisation percutaneous coronary intervention
Synonymous names:	Revascularisation PCI date
METEOR identifier:	359731
Registration status:	<a href="#">Health</a> , Standard 01/10/2008
Definition:	The date when a percutaneous coronary intervention (PCI) is performed for revascularisation.
Data Element Concept:	<a href="#">Person—revascularisation percutaneous coronary intervention date</a>
Value Domain:	<a href="#">Date DDMMYYYY</a>

## Value domain attributes

## Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

## Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
--------------------------	--

## Data element attributes

## Collection and usage attributes

Guide for use:	Revascularisation PCI relates to balloon angioplasty inflation and/or stent implantation performed for subsequent restoration of blood flow.
Comments:	Routine revascularisation PCI may be performed after ST-segment-elevation myocardial infarction for people with objective evidence of recurrent myocardial infarction in whom there is spontaneous or inducible ischaemia or haemodynamic instability. Revascularisation PCI may also be performed for treatment of high-risk non-ST-segment-elevation acute coronary syndrome.
