Person with cancer—histopathological grade, code N

Identifying and definitional attributes

| | |
|------------------------------|---|
| Metadata item type: | Data Element |
| Short name: | Histopathological grade |
| METEOR identifier: | 370019 |
| Registration status: | Health , Superseded 07/12/2011 |
| Definition: | <p>The histopathological grade or differentiation describes how much the tumour resembles the normal tissue from which it arose, as represented by a code.</p> <p>For lymphohaematopoietic neoplasms (leukaemias and lymphomas) this data element is used to denote cell lineage.</p> |
| Data Element Concept: | Person with cancer—histopathological grade |
| Value Domain: | Histopathological grade code N |

Value domain attributes

Representational attributes

| | |
|----------------------------------|--------|
| Representation class: | Code |
| Data type: | Number |
| Format: | N |
| Maximum character length: | 1 |

| | Value | Meaning |
|------------------------------|--------------|--|
| Permissible values: | 1 | Grade 1: Low grade; well differentiated, differentiated, NOS |
| | 2 | Grade 2: Intermediate grade, moderately differentiated, moderately well differentiated, intermediate differentiation |
| | 3 | Grade 3: High grade, poorly differentiated |
| | 4 | Grade 4: Undifferentiated, anaplastic |
| | 5 | T-cell: T-cell |
| | 6 | B-cell: B-cell, Pre-B, B-Precursor |
| | 7 | Null-cell: Null cell, Non T- non B |
| | 8 | NK-cell: Natural killer cell |
| Supplementary values: | 9 | Grade/differentiation unknown: Grade/cell type not determined, not stated or not applicable |

Data element attributes

Collection and usage attributes

Guide for use: Only one code can be recorded.

When more than one grade is documented for the primary tumour within the same specimen report, use the highest grade. For example, if grade 2-3 is documented, record the grade as 3.

If the grades differ on multiple pathology reports for the same tumour, use the value from the larger specimen (for example, the grade from a surgical excision specimen would be used over the grade from a specimen from a diagnostic biopsy).

Breast cancer coding rules:

Use the Nottingham grade (Elston-Ellis modification of Bloom-Richardson grading system). This classification only uses grades 1-3, 9.

For an invasive tumour with an in situ component, record the grade for the invasive component only. If the grade of the invasive component is not reported, record the grade as unknown.

Collection methods: Cancer registry use:

Collection of this data item should only be from notification and pathology reports relating to initial diagnosis and not for recurrent or metastatic disease.
