Person with cancer—number of positive sentinel lymph nodes, total code N[NN]

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Number of positive sentinel lymph nodes

METEOR identifier: 370549

Registration status: Health, Standard 06/03/2009

Definition: The total number of sentinel lymph nodes reported as containing tumour after

examination by a pathologist.

Data Element Concept: Person with cancer—number of positive sentinel lymph nodes

Value Domain: <u>Total lymph nodes code N[NN]</u>

Value domain attributes

Representational attributes

Representation class: Total

Data type: Number

Format: N[NN]

Maximum character length: 3

Value Meaning

Supplementary values: 997 Number of lymph nodes unknown

Data element attributes

Collection and usage attributes

Collection methods: For cancer registries:

Collection of this data item should only be from notification and pathology reports

relating to initial diagnosis and not for recurrent or metastatic disease.

Comments: Sentinel lymph nodes are the first nodes that filter fluid draining away from the area

of cancer. The number of lymph nodes with metastasis is important for cancer

staging
