Occupied bed—hospital in the home care

Identifying and definitional attributes

| | |
|----------------------|--|
| Metadata item type: | Data Element Concept |
| METEOR identifier: | 373953 |
| Registration status: | Health , Standard 24/03/2009 |
| Definition: | The number of beds used to care for hospital admitted patients in their place of residence as a substitute for hospital accommodation. Place of residence may be permanent or temporary. |

Object Class attributes

Identifying and definitional attributes

| | |
|--------------------|---|
| Object class: | Occupied bed |
| Definition: | An occupied bed is an available bed where there is a patient physically in the bed or the bed is being retained for a patient (e.g. the patient is receiving treatment or is on leave). |
| Specialisation of: | Organisation |

Collection and usage attributes

| | |
|-----------|--|
| Comments: | <p>Beds may be available but not occupied, e.g. an 8 bed ward may be fully staffed, but only 7 beds are occupied. Also if a patient has left a bed to receive a different care type and will not be returning within 24 hours, the bed is not occupied.</p> <p>The Occupancy Rate is calculated by dividing total bed days in a period by the product of the available beds and the days in the period – e.g. if in a non-leap year patients accumulated 33,000 bed days in a hospital with 100 overnight-stay beds, the occupancy rate = $33,000 / (365 * 100) = 90.4\%$. N.B. Occupancy rates calculated for same-day beds could exceed 100%.</p> |
|-----------|--|

Property attributes

Identifying and definitional attributes

| | |
|-----------------|---|
| Property: | Hospital in the home care |
| Definition: | Provision of care to hospital admitted patients in their place of residence as a substitute for hospital accommodation. Place of residence may be permanent or temporary. |
| Property group: | Service provision event |
