

Computer Assisted Telephone Interview demographic module NBPDS

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 374218

Registration status:

- [Health](#), Standard 03/12/2008

DSS type: Data Set Specification (DSS)

Scope: Key demographic set for use in Computer Assisted Telephone Interviewing (CATI) health surveys. It is intended to be used by anyone conducting population health surveys using the CATI mode, such as State/Territory government health agencies. This data set is to standardise demographic collection in all CATI surveys of health topics, such as CATI asthma and CATI diabetes surveys.

The standardisation of the collection of health survey data is a major focus of the National Public Health Partnership (NPHP) work plan. The CATI demographic module National best practice data set is not mandated for collection but recommended as best practice.

Collection and usage attributes

Collection methods: Population health surveys conducted by CATI

Source and reference attributes

Submitting organisation: National Public Health Information Working Group.
