Informal carer—relationship to care recipient, code N[N]

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Relationship of carer to care recipient

Synonymous names: Carer relationship to care recipient

METEOR identifier: 376502

Registration status: Community Services (retired), Superseded 10/04/2013 [Non Dictionary]

Definition: The relationship of the <u>informal carer</u> to the person for whom they care as

represented by a code.

Context: Ageing, carers and disability.

Data Element Concept: Informal carer—relationship to care recipient

Value Domain: <u>Carer relationship code N[N]</u>

Value domain attributes

Representational attributes

Representation class: Code

Data type: Number

Format: N[N]

Maximum character length: 2

Value Meaning

Permissible values: Spouse/partner

Wife/female partner
 Husband/male partner

Parent

3 Mother4 Father

Child

5 Daughter

6 Son

Child-in-law

7 Daughter-in-law

8 Son-in-law

Other relative

9 Other female relative10 Other male relative

Friend/neighbour

11 Female friend12 Male friend

Supplementary values: 99 Not stated/inadequately described

Source and reference attributes

Origin: Commonwealth State/Territory Disability Agreement National Minimum Data Set

(CSTDA NMDS) collection. Data Guide: data items and definitions 2006-07.

Data element attributes

Collection and usage attributes

Guide for use: This data element should always be used to record the relationship of the carer to

the person for whom they care, regardless of whether the client of the agency is the

carer or the person for whom they care.

When answering this question the person is asked to complete the sentence, 'The

carer is the person's ...'

The expressed views of the client and/ or their carer or significant other should be

used as the basis for determining which carer should be considered to be the

primary or principal carer in this regard.

CODES 1 and 2 Male/Female partner

Include defacto and same sex partnerships.

CODES 3 and 4 Mother/Father

Includes foster parents

CODE 99 Not stated inadequately described

This code should only be recorded where the carer has not been identified. This

code is not for use in primary data collections.

Comments: Information about this relationship assists in the establishment of a profile of

> informal caring relationships and the assistance provided to maintain and support those relationships. As such it increases knowledge about the dynamics of caring and provides an insight into the gender and inter-generational patterns of informal

care giving in the community.

Implementation in Data Set Disability Services NMDS 2009-10

Specifications:

Community Services (retired), Superseded 15/12/2011

Implementation start date: 01/07/2009

DSS specific information:

This data element should only be reported in relation to service users that have a

carer.

A service user may have more than one family member or friend providing them with care and assistance. In such circumstances, this data element relates to the carer who is identified as providing the most significant amount and type of care

and assistance. It is recognised that two or more people may equally share the caring role (e.g. mother and father) however, for the purposes of the DS NMDS collection, characteristics are only requested for one of these carers. The expressed views of the service user and/or their carer or significant other should be used as the basis for determining which carer should be considered to be the main carer in this regard.

Disability Services NMDS 2010-11

Community Services (retired), Superseded 15/12/2011

Disability Services NMDS 2012-14

Community Services (retired), Standard 13/03/2013

Implementation start date: 01/07/2012 Implementation end date: 30/06/2014

Conditional obligation:

This data element should only be reported in relation to <u>service users</u> that have a carer (<u>Person—Informal carer existence indicator</u>, code N = 1).

DSS specific information:

In the DS NMDS this refers to the person's main informal carer—the person who provides the most significant care and assistance related to the service user's capacity to remain living in their current environment. It is recognised that two or more people may equally share the caring role (e.g. mother and father) however, for the purposes of this collection, characteristics are only requested for one of these carers.

If a person has more than one carer (e.g. a spouse and a son), the coding response to carer relationship should relate to the carer who provides the most significant care and assistance related to the person's capacity to remain living in their current environment (i.e. the main carer). The expressed views of the service user and/or their carer or significant other should be considered to be the primary or principal carer in this regard.

Code 9 (other female relative), allows for the wide range of family members who

may be involved in a caring role with the service user. This code therefore includes the female family members not listed in the codes elsewhere (e.g. aunts, nieces, female cousins, grandmothers, step mother, step daughters and so on).

Similarly, code 10 (other male relative) covers the range of male family members who may act as carers. This code includes the male family members not listed in the codes elsewhere (e.g. uncles, nephews, male cousins, grandfathers, male grandchildren, step father, step sons and so on).

Implementation in Indicators:

Used as Disaggregation

National Disability Agreement: h-Proportion of carers of people with disability accessing support services to assist in their caring role (h-interim), 2012

Community Services (retired), Superseded 23/05/2013
