**Collection methods:** *National reporting arrangements*

Registered health professionals provide data to the Australian Health Practitioner Regulation Agency as part of their initial registration and registration renewal processes. The data includes information required for registration purposes and additional workforce data.

The Australian Health Practitioner Regulation Agency provides an extract of these data to the Australian Institute of Health and Welfare (AIHW) for the purposes of national collation and reporting. The data in this NBEDS primarily comprises workforce data.

*Periods for which data are collected and collated*

Data are collated annually for each profession. The period is determined by the national registration renewal period for health professionals and may differ between health professions.
