Service event—service delivery setting, HACC code [N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Service delivery setting (HACC)
METEOR identifier:	382422
Registration status:	Community Services (retired), Recorded 16/11/2009
Definition:	The setting in which the person receives assistance from the agency on a service delivery event.
Context:	The data element Service delivery setting is one of a cluster of data elements that describe a HACC service event or one occasion of service delivery to a client. At this stage of HACC MDS development, agencies are not required to report information about individual HACC service events. However, the Service delivery setting is required to be recorded by HACC agencies for each service delivery event when the Primary type of assistance received is one of the following:

• Nursing Care
• Allied Health Care
• Meals.

Information about the Service delivery setting for these types of assistance is required to support the reporting of the data elements Total amount of type of assistance received (time) and Total amount of type of assistance received (quantity).

Information about the types of setting in which people receive HACC services is important in evaluating the ways in which the HACC program responds to the needs of clients. Recording the setting in which services are delivered indicates the extent to which support and assistance are provided to a client in their usual place of residence as opposed to those provided in other settings to which a person may need to specifically travel.

Future developments in the HACC MDS may require information about the setting in which services are delivered to clients for other types of assistance provided by HACC agencies. |
| **Data Element Concept:** | Service event—service delivery setting |
| **Value Domain:** | HACC service delivery setting code N |

Value domain attributes

Representational attributes

Representation class:	Code
Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Home
	2	Centre/Other

Collection and usage attributes

Guide for use:	CODE 1 Home
	This code should be used when nursing care, allied health care or meals are provided to a person in the place where they reside. Home should be considered to encompass any place where the person is living during the period of service receipt from the agency, irrespective of whether that place is a private residence, community facility or institutional setting.
	CODE 2 Centre/other
	This code refers to the provision of nursing care, allied health care or meals to people in non-residential centre based settings such as day centres, senior citizen's centres, community health centres, medical clinics, multipurpose centres and community support centres. This category also includes provision of nursing care, allied health care and meals to people in an everyday location such as a school or workplace and any which are not considered to be the person's home for the purposes of the HACC MDS. It also includes the receipt of nursing care, allied health care or meals assistance within the private home of a paid care provider.

Data element attributes

Collection and usage attributes

Collection methods:	This data element should be collected for any HACC service event for which the Primary type of assistance received is nursing care, allied health care or meals. Agencies are not required to collect information about the Service delivery setting for any other types of assistance.
	Where the primary focus of a service event is nursing care, allied health care or meals, the agency should record Service delivery setting in conjunction with the other information that the agency is required to collect about the service delivery event (that is, Assistance received date, Type of assistance/support, Funding source category and either Amount of assistance received (time) or Amount of assistance received (quantity)).
Comments:	Reporting requirements: This data element is not required for reporting within the HACC MDS collection. However, it is required to support the reporting of the data elements Total amount of assistance received (time) and Total amount of assistance received (quantity). For nursing care, allied health care and meals, agencies will be required to report total amounts of assistance received in the following format:
	• Nursing care received at home
	• Nursing care received at centre/other
	• Allied health care received at home
	• Allied health care received at centre/other
	• Meals received at home
	• Meals received at centre/other.
