Age

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person—age, total years N[NN]
<i>METeOR identifier:</i>	303794
<i>Registration status:</i>	NHIG, Standard 08/02/2006 NCSIMG, Standard 29/04/2006 NHDAMG, Standard 10/02/2006
<i>Definition:</i>	The age of the person in (completed) years at a specific point in time.
<i>Context:</i>	Age is a core data element in a wide range of social, labour and demographic statistics. It is used in the analyses of service utilisation by age group and can be used as an assistance eligibility criterion.

Data element concept attributes

<i>Data element concept:</i>	Person—age
<i>Definition:</i>	The age of the person.
<i>Context:</i>	Age is a core data element in a wide range of social, labour and demographic statistics.
<i>Object class:</i>	Person
<i>Property:</i>	Age

<i>Supplementary values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>999</td><td>Unknown/not stated</td></tr></tbody></table>	Value	Meaning	999	Unknown/not stated
Value	Meaning				
999	Unknown/not stated				
<i>Unit of measure:</i>	Year				

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	Age in single years (if aged under one year, record as zero). If age (or date of birth) is unknown or not stated, and cannot be estimated, use Code 999. National community services and housing assistance data dictionary specific: If year of birth is known (but date of birth is not) use the date, 0101YYYY of the birth year to estimate age (where YYYY is the year of birth). National housing assistance data dictionary specific: In the housing assistance data collections age is calculated at 30 June for the corresponding year.
<i>Collection methods:</i>	Although collection of date of birth allows more precise calculation of age, this may not be feasible in some data collections, and alternative questions are: Age last birthday? What was age last birthday? What is age in complete years?
<i>Comments:</i>	National community services data dictionary specific:

Different rules for reporting data may apply when estimating the Date of birth of children aged under 2 years since the rapid growth and development of children within this age group means that a child's development can vary considerably over the course of a year. Thus, more specific reporting of estimated age is recommended.

Those who need to conduct data collections for children where age is collected in months, weeks, or days should do so in a manner that allows for aggregation of those results to this standard.

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	Age in single years (if aged under one year, record as 0). Dwelling age is calculated using the date on which construction was completed, regardless of when it was purchased or occupied. If year of construction is known (but the full date is not) use the date 01/01 of the construction year to estimate age. If age (or date of construction) is unknown or not stated, and cannot be estimated, use code 999.
<i>Collection methods:</i>	This metadata item can be derived from Dwelling—construction completion date, DDMMYYYY.

Capital expenditure – gross

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Housing assistance agency—gross capital expenditure (sales of non–financial assets), total Australian currency N[N(9)]
<i>METeOR identifier:</i>	305336
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006
<i>Definition:</i>	Total expenditure on sales of non–financial assets (Economic Type Framework Classification code 2223).

Data element concept attributes

<i>Data element concept:</i>	Housing assistance agency—gross capital expenditure (sales of non–financial assets)
<i>Definition:</i>	The disposal of previously rented dwellings, non–residential buildings, used plant and equipment.
<i>Context:</i>	To enable analysis of welfare expenditure at the national level.

There is a considerable interest in expenditure data at the national level from many different potential users.

This metadata item is based on relevant sections of the Economic Type Framework Classification (ETF) within the Australian Bureau of Statistics (ABS) Australian System of Government Finance Statistics (GFS). The GFS summarises the broad reporting requirements of government bodies for Public Sector Accounts. As part of these reporting requirements, governments need to obtain certain information from funded organisations. This metadata item is presented in the interests of facilitating reporting.

The ETF is based on established accounting principles and specifies an operating statement, cash flow statement, reconciliation statement, supplementary statement, intra–unit transfers other than revaluations and accrued transactions, revaluations and other changes in the volume of assets and, a balance sheet.

<i>Object class:</i>	Housing assistance agency
<i>Property:</i>	Gross capital expenditure

Collection and usage attributes

<i>Guide for use:</i>	For more explanation of and details on expenditure types, see the Detailed Economic Type Framework Classification in Australian System of Government Finance Statistics: Concepts, Sources and Methods, 2005.

<i>Format:</i>	N[N(9)]
<i>Maximum character length:</i>	10
<i>Unit of measure:</i>	Australian currency (AU\$)

Unit of measure precision: 0

Data element attributes

Collection and usage attributes

Guide for use: Refers to the sale of land (including the sale of residential leases in the ACT). The sale of land and buildings as a package is treated as sales of fixed assets unless a separate value can be determined for the land component. Also refers to the outright sales of intangible assets and disposal of motor vehicles.

Collection methods: Measurement on an accrual accounting basis is preferred to measurement on a cash accounting basis.

This metadata item is typically measured for a financial year (1 July to 30 June the following year).

Capital expenditure–gross (total)

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Housing assistance agency—gross capital expenditure, total Australian currency N[N(9)]
<i>METeOR identifier:</i>	305344
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006
<i>Definition:</i>	Total gross capital (Economic Type Framework Classification codes 222 and 4101).

Data element concept attributes

<i>Data element concept:</i>	Housing assistance agency—gross capital expenditure
<i>Definition:</i>	Total capital expenditure.
<i>Context:</i>	To enable analysis of welfare expenditure at the national level.

There is a considerable interest in expenditure data at the national level from many different potential users.

This metadata item is based on relevant sections of the Economic Type Framework Classification (ETF) within the Australian Bureau of Statistics (ABS) Australian System of Government Finance Statistics (GFS). The GFS summarises the broad reporting requirements of government bodies for Public Sector Accounts. As part of these reporting requirements, governments need to obtain certain information from funded organisations. This metadata item is presented in the interests of facilitating reporting.

The ETF is based on established accounting principles and specifies an operating statement, cash flow statement, reconciliation statement, supplementary statement, intra–unit transfers other than revaluations and accrued transactions, revaluations and other changes in the volume of assets and, a balance sheet.

<i>Object class:</i>	Housing assistance agency
<i>Property:</i>	Gross capital expenditure

Collection and usage attributes

<i>Guide for use:</i>	For more explanation of and details on expenditure types, see the Detailed Economic Type Framework Classification in Australian System of Government Finance Statistics: Concepts, Sources and Methods, 2005.

Collection and usage attributes

Guide for use: **Code 1 Housing association:**

A not-for-profit organisation that is managed by a committee and is often linked to other community support services. In associations day-to-day management of the organisation is delegated to staff and/or volunteers. In some states and territories housing associations are legally incorporated and registered under state or territory community housing acts.

Code 2 Housing cooperative:

A not-for-profit organisation that is managed by the tenants (self-managed). In cooperatives responsibility for day-to-day management is usually shared amongst tenant members on a voluntary basis. In some states and territories housing cooperatives are legally incorporated and registered under state or territory housing acts.

Code 3 Other community service organisation:

Not-for-profit organisations who provide housing assistance as part of their support services, such as welfare, church-based and local government organisations (e.g. Barnardos, St Vincent de Paul).

Country of birth

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person—country of birth, code (SACC 1998) NNNN
<i>METeOR identifier:</i>	270277
<i>Registration status:</i>	NHIG, Standard 01/03/2005 NCSIMG, Standard 01/03/2005 NHDAMG, Standard 20/06/2005
<i>Definition:</i>	The country in which the person was born, as represented by a code.

Data element concept attributes

<i>Data element concept:</i>	Person—country of birth
<i>Definition:</i>	The country in which the person was born.
<i>Context:</i>	Country of birth is important in the study of access to services by different population sub-groups. Country of birth is the most easily collected and consistently reported of a range of possible data items that may indicate cultural or language diversity. Country of birth may be used in conjunction with other data such as period of residence in Australia, etc., to derive more sophisticated measures of access to (or need for) services by different population sub-groups.
<i>Object class:</i>	Person
<i>Property:</i>	Country of birth

Value domain attributes

Representational attributes

<i>Classification scheme:</i>	Standard Australian Classification of Countries 1998
<i>Representation class:</i>	Code
<i>Data type:</i>	Number
<i>Format:</i>	NNNN
<i>Maximum character length:</i>	4

Collection and usage attributes

<i>Guide for use:</i>	The Standard Australian Classification of Countries 1998 (SACC) is a four-digit, three-level hierarchical structure specifying major group, minor group and country.
-----------------------	--

A country, even if it comprises other discrete political entities such as states, is treated as a single unit for all data domain purposes. Parts of a political entity are not included in different groups. Thus, Hawaii is included in Northern America (as part of the identified country United States of America), despite being geographically close to and having similar social and cultural characteristics as the units classified to Polynesia.

Data element attributes

Collection and usage attributes

<i>Collection methods:</i>	Some data collections ask respondents to specify their country of birth. In others, a pre-determined set of countries is specified as part of the question, usually accompanied by an 'other (please specify)' category.
----------------------------	--

Recommended questions are:

In which country were you/was the person/was (name) born?

Australia

Other (please specify)

Alternatively, a list of countries may be used based on, for example common Census responses.

In which country were you/was the person/was (name) born?

Australia

England

New Zealand

Italy

Viet Nam

Scotland

Greece

Germany

Philippines

India

Netherlands

Other (please specify)

In either case coding of data should conform to the SACC.

Sometimes respondents are simply asked to specify whether they were born in either 'English speaking' or 'non-English speaking' countries but this question is of limited use and this method of collection is not recommended.

Comments:

This metadata item is consistent with that used in the Australian Census of Population and Housing and is recommended for use whenever there is a requirement for comparison with Census data.

Date assistance commenced

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Housing assistance episode—assistance commencement date, DDMMYYYY
<i>METeOR identifier:</i>	270233
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005

Data element concept attributes

<i>Data element concept:</i>	Housing assistance episode—assistance commencement date
<i>Definition:</i>	The date on which the provision of housing assistance to a household by an agency commenced, as distinct from the date the household applies and is entered on the waiting list or assessed for eligibility.
<i>Context:</i>	This metadata item is used in calculation of measures of periods of support and duration of assistance and for measuring various point in time data.
<i>Object class:</i>	Housing assistance episode
<i>Property:</i>	Assistance commencement date

Source and reference attributes

<i>Submitting organisation:</i>	National Housing Data Development Committee
---------------------------------	---

Value domain attributes

Representational attributes

<i>Representation class:</i>	Date
<i>Data type:</i>	Date/Time
<i>Format:</i>	DDMMYYYY
<i>Maximum character length:</i>	8

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	The date recorded should be the date on which the client has begun to receive some form of assistance. This could be the provision of housing, a home loan, grants, advice or referral.
-----------------------	---

This metadata item should always be recorded as an 8–digit valid date comprising day, month and year. Year should always be recorded in its full 4–digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example, if a housing assistance episode starts on July 1 2000 the Date assistance commenced should be recorded as 01072000.

<i>Collection methods:</i>	Date assistance commenced must be related to a particular housing assistance episode. For each separate housing assistance episode, a separate date assistance commenced should be recorded. Same address transfers, mutual exchanges and succession of tenancy of dwellings are not considered separate housing assistance episodes of assistance.
----------------------------	---

It should also be related to a particular program type (e.g. public rental housing, home purchase assistance).

For the Commonwealth–State Housing Agreement (CSHA) public rental housing and state owned and managed Indigenous housing data collections the *Housing assistance episode—assistance commencement date*, DDMMYYYY should be taken from the date specified on the tenancy agreement. Tenants may actually move in at a later date than this date.

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	This metadata item should always be recorded as an 8–digit valid date comprising day, month and year. Year should always be recorded in its full 4–digit format. For days and months with a numeric value of less than 10, zeros should be used to ensure that the date contains the required 8 digits. For example, the date July 1 2002 should be recorded as 01072002.
<i>Collection methods:</i>	If the date the dwelling was vacated by tenants is not known, for example, abandonment by tenants, the date the dwelling is discovered to be vacant should be used instead.

The *Dwelling–date vacated, DDMMYYYY* may not be the same as the *Housing service episode–assistance completion date, DDMMYYYY* as tenants may move out of a dwelling before the *Dwelling–date vacated, DDMMYYYY*.

Date of birth

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person—date of birth, DDMMYYYY
<i>METeOR identifier:</i>	287007
<i>Registration status:</i>	NHIG, Standard 04/05/2005 NCSIMG, Standard 25/08/2005 NHDAMG, Standard 20/06/2005
<i>Definition:</i>	The date of birth of the person.

Data element concept attributes

<i>Data element concept:</i>	Person—date of birth
<i>Definition:</i>	The date of birth of the person.
<i>Context:</i>	Required for a range of clinical and administrative purposes.

Date of birth enables derivation of age for use in demographic analyses, assists in the unique identification of clients if other identifying information is missing or in question, and may be required for the derivation of other metadata items (e.g. the diagnosis related group for admitted patients).

<i>Object class:</i>	Person
<i>Property:</i>	Date of birth

Value domain attributes

Representational attributes

<i>Representation class:</i>	Date
<i>Data type:</i>	Date/Time
<i>Format:</i>	DDMMYYYY
<i>Maximum character length:</i>	8

Data element attributes

Collection and usage attributes

Guide for use: If date of birth is not known or cannot be obtained, provision should be made to collect or estimate age. Collected or estimated age would usually be in years for adults, and to the nearest three months (or less) for children aged less than two years. Additionally, an estimated date flag or a date accuracy indicator should be reported in conjunction with all estimated dates of birth.

For data collections concerned with children's services, it is suggested that the estimated date of birth of children aged under 2 years should be reported to the nearest 3 month period, i.e. 0101, 0104, 0107, 0110 of the estimated year of birth. For example, a child who is thought to be aged 18 months in October of one year would have his/her estimated date of birth reported as 0104 of the previous year. Again, an estimated date flag or date accuracy indicator should be reported in conjunction with all estimated dates of birth.

Collection methods: Information on date of birth can be collected using the one question:

What is your/(the person's) date of birth?

In self-reported data collections, it is recommended that the following response format is used:

Date of birth: __ / __ / ____

This enables easy conversion to the preferred representational layout (DDMMYYYY).

For record identification and/or the derivation of other metadata items that require accurate date of birth information, estimated dates of birth should be identified by a date accuracy indicator to prevent inappropriate use of date of birth data. The linking of client records from diverse sources, the sharing of patient data, and data analysis for research and planning all rely heavily on the accuracy and integrity of the collected data. In order to maintain data integrity and the greatest possible accuracy an indication of the accuracy of the date collected is critical. The collection of an indicator of the accuracy of the date may be essential in confirming or refuting the positive identification of a person. For this reason it is strongly recommended that the data element Date—accuracy indicator, code AAA also be recorded at the time of record creation to flag the accuracy of the data.

Comments:

Privacy issues need to be taken into account in asking persons their date of birth.

Wherever possible and wherever appropriate, date of birth should be used rather than age because the actual date of birth allows a more precise calculation of age.

When date of birth is an estimated or default value, national health and community services collections typically use 0101 or 0107 or 3006 as the estimate or default for DDMM.

It is suggested that different rules for reporting data may apply when estimating the date of birth of children aged under 2 years because of the rapid growth and development of children within this age group which means that a child's development can vary considerably over the course of a year. Thus, more specific reporting of estimated age is suggested.

<i>Maximum character length:</i>	4

Collection and usage attributes

<i>Comments:</i>	Postcode – Australian may be used in the analysis of data on a geographical basis, which involves a conversion from postcodes to the Australian Bureau of Statistics (ABS) postal areas. This conversion results in some inaccuracy of information. However, in some data sets postcode is the only geographic identifier, therefore the use of other more accurate indicators (e.g. Statistical Local Area (SLA)) is not always possible.
------------------	--

When dealing with aggregate data, postal areas, converted from postcodes, can be mapped to Australian Standard Geographical Classification codes using an ABS concordance, for example to determine SLAs. It should be noted that such concordances should not be used to determine the SLA of any individual's postcode. Where individual street addresses are available, these can be mapped to ASGC codes (e.g. SLAs) using the ABS National Localities Index (NLI).

Collection and usage attributes

<i>Guide for use:</i>	<p>Code 1. Separate house: A house separated from other houses (or other buildings or structures) by space to allow access on all sides (at least 1/2 a metre). This category also includes houses which have an attached flat (e.g. a granny flat). The attached flat will be included in the 'Flat, unit or apartment' category.</p> <p>Code 2. Semi-detached, row or terrace house, townhouse, etc.: Includes dwellings with their own private grounds and no dwelling above or below. A key feature of these dwellings is that they are either attached in some structural way to one or more dwellings or are separated from neighbouring dwellings by less than 1/2 a metre. Examples include semi-detached, row or terrace houses, townhouses, and villa units. Multi-storey townhouses or units are separately identified from those which are single storey.</p>
-----------------------	---

Code 3. Flat, unit or apartment: Includes dwellings in blocks of flats, units or apartments that are self-contained. These dwellings do not have their own private grounds and usually share a common entrance foyer or stairwell. This category includes houses converted into flats, and flats attached to houses such as granny flats.

Code 4. Caravan, tent, cabin etc. in caravan park, houseboat in marina, etc.: Includes all types of accommodation within a caravan park. It also includes all occupied water craft in marinas.

Code 5. Caravan not in caravan park, houseboat not in marina, etc.: Includes all mobile units, on water or land, occupied on a permanent or semi-permanent basis by people (e.g. caravans, campervans, mobile houses, small boats, houseboats) that are not in caravan parks or marinas.

Code 6. Improvised home, tent, campers out: Includes all structures not elsewhere classified that are occupied by people on a permanent or semi-permanent basis. This category typically includes garages, sheds, tents, shacks, etc. These structures are only included in this category if they are not in a caravan park.

Code 7. House or flat attached to a shop, office, etc.: Includes all houses or flats that are attached to a non-residential building. Examples of these dwellings are manses attached to a church, a flat or apartment over a shop, and a caretaker's house or flat attached to a school, factory or storage facility.

Code 8. Boarding/rooming house unit: A **boarding/rooming house unit** is a self-contained unit within a boarding house with separate cooking, bathroom, and toilet facilities. Boarding house units are usually accessed via a common entrance such as a foyer or hallway. Please note: this structure type identifies the individual rooms in a boarding/rooming house, not the complete building.

Comments:

Based on a modified combination of the 1996 and 2001 Australian Bureau of Statistics Census.

<i>Technical name:</i>	Dwelling—tenantability status, code N
<i>METeOR identifier:</i>	302930
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006
<i>Definition:</i>	A code that represents whether a dwelling is tenantable.

Data element concept attributes

<i>Data element concept:</i>	Dwelling—tenantability status
<i>Definition:</i>	A dwelling for which maintenance has been completed and can be either occupied or not occupied.
<i>Context:</i>	Dwelling tenantability is related to the concept of tenant, with its associated rights and responsibilities. A tenantable dwelling usually provides a certain level of basic amenity and maintenance is completed to the required minimum level. A dwelling that is occupied, but is not tenantable, indicates an unmet housing need.

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	The level of upgrade required for a dwelling should be based on the decision of the property or asset manager/management.
-----------------------	---

Upgrades are defined as dwelling activity that improve the dwelling above its original condition or amenity. It excludes all repairs and maintenance activity, i.e. day-to-day maintenance, reflecting general wear and tear; cyclical maintenance, which is maintenance performed as part of a planned maintenance program; and other maintenance, e.g. repairs due to vandalism.

Code 1 Minor upgrade: Upgrade that does not prevent tenancy or removal from stock list awaiting allocation.

Code 2 Major upgrade: Stock is removed from current available dwellings or is in a condition that is deemed uninhabitable.

-----------------------	--

State grid/transmitted supply: electricity generated by a large power station which transmits electricity to the community or urban centre through a network of high voltage powerlines. Electricity generation can be produced in a number of ways such as hydro–electric, coal and natural gas.

Community generators: power generator usually fuelled by diesel or natural gas and typically has the capacity to generate enough power for 20 or more dwellings.

Domestic generators: power generator run off either diesel, fuel or petrol. A

domestic generator is designed to provide power to one dwelling by could support two dwellings.

Solar: this method of power generation captures the heat of the sun and converts this heat into electricity, or uses the heat directly. Solar power used only to provide hot water is excluded.

Other: includes hydro–electric, wind, biomass, methane.

-----------------------	--

Town system: a water-borne system (i.e. a water carrying system) servicing a town, with a typical domestic cistern, where water is used to flush and transport wastes away from the dwelling for treatment and disposal.

Community water-borne system: a water borne system with a typical domestic cistern, where water is used to flush and transport wastes for nearby treatment and disposal. This is a complete system only serving a community, and is not connected to any other town or community.

Septic tank with common effluent disposal: a water-borne system in which individual dwellings have a septic tank for initial treatment of the sewerage, and where water from the septic tanks is piped to a common effluent pond for final treatment and disposal. The septic tanks in this system do not have a

leach drain.

Septic tank with leach drain: a water-borne system in which individual houses have a septic tank connected to a leach drain for local disposal of waste water adjacent to each dwelling. This also includes cases where two dwellings may be connected to the one septic tank and/or leach drain.

Pit toilet: a dry toilet comprising of a single hole in the ground. No water is used for disposal of the human waste. There are several types including the simple shallow drop-hole toilet, the deeper bore-hole toilet, and the shallow vented improved pit latrine.

Pan toilet: a dry toilet. Human waste is collected in pans and these pans are collected and transported away from the community for disposal at another site.

-----------------------	---

Town supply: a water supply organised for a town which is usually maintained by a water authority or shire council. Excludes a reticulated supply (water piped to a household) from a dam or river.

Bore water: deep underground water that is pumped to the surface through pipe(s) running down hole(s) drilled in the ground to tap this deep source of water. Includes artesian bores, where the water gushes out of the bore hole under its own pressure.

Rain water tank(s): a storage tank that receives rain water falling on roofs of

structures (houses, buildings, sheds) via guttering and pipes.

Well or spring: a well is a hole (of larger diameter than a bore) dug in the ground to reach a shallow source of permanent underground water. A spring is a shallow underground source which reaches the surface under its own pressure.

<i>Guide for use:</i>	<p>The agency or establishment should record the client's full family name on their information systems.</p> <p>National Community Services Data Dictionary specific:</p> <p>In instances where there is uncertainty about which name to record for a person living in a remote Aboriginal or Torres Strait Islander community, Centrelink follows the practice of recording the Indigenous person's name as it is first provided to Centrelink. Or, where proof of identity is required, as the name is recorded on a majority of the higher point scoring documents that are produced as proof of identity.</p>
<i>Collection methods:</i>	<p>This metadata item should be recorded for all persons who receive services from or are of interest to an organisation. For the purposes of positive identification, it may also be recorded for providers of those services who are individuals.</p> <p>Mixed case should be used.</p> <p>Family name should be recorded in the format preferred by the person. The format should be the same as that written by the person on a (pre) registration form or in the same format as that printed on an identification card, such as Medicare card, to ensure consistent collection of name data.</p> <p>It is acknowledged that some people use more than one family name (e.g. formal name, birth name, married/maiden name, tribal name) depending on the circumstances. Each name should be recorded against the appropriate</p>

Name type (see Comments).

A person is able to change his or her name by usage in all States and Territories of Australia with the exception of Western Australia, where a person may only change his or her name under the Change of Name Act. Care should be taken when recording a change of name for a minor. Ideally, the name recorded for the minor should be known to both of his/her parents, so the minor's records can be retrieved and continuity of care maintained, regardless of which parent accompanies the minor to the agency or establishment.

A person should generally be registered using their preferred name as it is more likely to be used in common usage and on subsequent visits to the agency or establishment. The person's preferred name may in fact be the name on their Medicare card. The Person name type metadata item can be used to distinguish between the different types of names that may be used by the person. The following format may assist with data collection:

What is your family name? _____

Are you known by any other family names that you would like recorded? If so, what are they

Please indicate, for each name above, the 'type' of family name that is to be recorded:

(a) Medicare card name (if different to preferred name).

(b) Alias (any other name that you are known by). Whenever a person informs the agency or establishment of a change of family name (e.g. following marriage or divorce), the former name should be recorded as an alias name. A full history of names should be retained. e.g. 'Mary Georgina Smith' informs the hospital that she has been married and changed her family name to 'Jones'. Record 'Jones' as her preferred family name and record 'Smith' as an alias name.

Hyphenated family names:

Sometimes persons with hyphenated family names use only one of the two hyphenated names. It is useful to record each of the hyphenated names as an alias. If the person has a hyphenated family name, e.g. 'Wilson–Phillips' record 'Wilson–Phillips' in the preferred family name field and record 'Wilson' and 'Phillips' separately as alias family names.

Punctuation:

If special characters form part of the family name they should be included, e.g. hyphenated names should be entered with a hyphen.

Examples:

– hyphen, e.g. Wilson–Phillips

Do not leave a space before or after a hyphen, i.e. between the last letter of 'Wilson' and the hyphen, nor a space between the hyphen and the first letter of 'Phillips'.

– apostrophe, e.g. O'Brien, D'Agostino

Do not leave a space before or after the apostrophe, i.e. between the 'O' and the apostrophe, nor a space between the apostrophe and 'Brien'.

– full stop, e.g. St. John, St. George

Do not leave a space before a full stop, i.e. between 'St' and the full stop. Do leave a space between the full stop and 'John'.

– space, e.g. van der Humm, Le Brun, Mc Donald

If the health care client has recorded their family name as more than one word, displaying spaces in between the words, record their family name in the same way leaving one space between each word.

Registered unnamed newborn babies:

When registering a newborn, use the mother's family name as the baby's family name unless instructed otherwise by the mother. Record unnamed babies under the newborn Name type.

Persons with only one name:

Some people do not have a family name and a given name, they have only one name by which they are known. If the person has only one name, record it in the 'Family name' field and leave the 'Given name' field blank.

Registering an unidentified person:

The default for unknown family name, should be unknown in all instances and the name recorded as an alias name. Don't create a 'fictitious' family name such as 'Doe' as this is an actual family name. When the person's name becomes known, record it as the preferred family name and do not overwrite the alias name of unknown.

Registering health care clients from disaster sites:

Persons treated from disaster sites should be recorded under the alias Name Type. Local business rules should be developed for consistent recording of disaster site person details.

Care should be taken not to use identical dummy data (family name, given name, date of birth, sex) for two or more persons from a disaster site.

If the family name needs to be shortened:

If the length of the family name exceeds the length of the field, truncate the family name from the right (that is, dropping the final letters). Also, the last character of the name should be a hash (#) to identify that the name has been truncated.

Use of incomplete names or fictitious names:

Some health care facilities permit persons to use a pseudonym (fictitious or partial name) in lieu of their full or actual name. It is recommended that the person be asked to record both the pseudonym (Alias name) in addition to the person's Medicare card name.

Baby for adoption:

The word adoption should not be used as the family name, given name or alias for a newborn baby. A newborn baby that is for adoption should be registered in the same way that other newborn babies are registered. However, if a baby born in the hospital is subsequently adopted, and is admitted for treatment as a child, the baby is registered under their adopted (current) name, and the record should not be linked to the birth record. This should be the

current practice. Any old references to adoption in client registers (for names) should also be changed to unknown. Contact your State or Territory adoption information service for further information.

Prefixes:

Where a family name contains a prefix, such as one to indicate that the person is a widow, this must be entered as part of the 'Family name' field. When widowed, some Hungarian women add 'Ozvegy' (abbreviation is 'Ozy') before their married family name, e.g. 'Mrs Szabo' would become 'Mrs Ozy Szabo'. That is, 'Mrs Szabo' becomes an alias name and 'Mrs Ozy Szabo' becomes the preferred name.

Ethnic Names:

The Centrelink publication, Naming Systems for Ethnic Groups, provides the correct coding for ethnic names.

Misspelled family name:

If the person's family name has been misspelled in error, update the family name with the correct spelling and record the misspelled family name as an alias name. Recording misspelled names is important for filing documents that may be issued with previous versions of the person's name. Discretion should be used regarding the degree of recording that is maintained.

Comments:

Often people use a variety of names, including legal names, married/maiden names, nicknames, assumed names, traditional names, etc. Even small differences in recording – such as the difference between MacIntosh and McIntosh – can make record linkage impossible. To minimise discrepancies in the recording and reporting of name information, agencies or establishments should ask the person for their full (formal) 'Given name' and 'Family name'. These may be different from the name that the person may prefer the agency or establishment workers to use in personal dealings. Agencies or establishments may choose to separately record the preferred names that the person wishes to be used by agency or establishment workers. In some cultures it is traditional to state the family name first. To overcome discrepancies in recording/reporting that may arise as a result of this practice, agencies or establishments should always ask the person to specify their first given name and their family name or surname separately. These should then be recorded as 'Given name' and 'Family name' as appropriate, regardless of the order in which they may be traditionally given.

National Community Services Data Dictionary specific:

Selected letters of the family name in combination with selected letters of the given name, date of birth and sex, may be used for record linkage for statistical purposes only.

<i>Classification scheme:</i>	Australian Standard Classification of Languages 2005
<i>Representation class:</i>	Code
<i>Data type:</i>	Number
<i>Format:</i>	NN{NN}
<i>Maximum character length:</i>	4

Collection and usage attributes

Guide for use: The Australian Standard Classification of Languages (ASCL) has a three-level hierarchical structure. The most detailed level of the classification consists of base units (languages) which are represented by four-digit codes. The second level of the classification comprises narrow groups of languages (the Narrow Group level), identified by the first two digits. The most general level of the classification consists of broad groups of languages (the Broad Group level) and is identified by the first digit. The classification includes Australian Indigenous languages and sign languages.

For example, the Lithuanian language has a code of 3102. In this case 3 denotes that it is an Eastern European language, while 31 denotes that it is a Baltic language. The Pintupi Aboriginal language is coded as 8713. In this case 8 denotes that it is an Australian Indigenous language and 87 denotes that the language is Western Desert language.

Language data may be output at the Broad Group level, Narrow Group level or base level of the classification. If necessary significant Languages within a Narrow Group can be presented separately while the remaining Languages in the Narrow Group are aggregated. The same principle can be adopted to highlight significant Narrow Groups within a Broad Group.

Data element attributes

Collection and usage attributes

Collection methods: Data should be captured, classified and stored at the base level of the classification wherever possible as this allows the greatest flexibility for output.

Recommended question:

Which language did you/the person/name first speak as a child?

English
Italian
Greek
Cantonese
Mandarin
Arabic
Vietnamese
German
Spanish
Tagalog (Filipino)
Other (please specify)

While agencies are encouraged to use the recommended question described above, it is acknowledged that this is not always possible in practice. For example, where the data collection is a by-product of the provision of a health or community service, the information may be ascertained using different means. However, this standard should be used wherever practically possible.

Comments:

Persons whose first language is not English have been identified by service providers as a population group that may experience disadvantage when seeking to obtain equal access to government and community programs and services in Australia. Data relating to 'First language spoken' may thus provide a surrogate indicator of disadvantage potentially associated with a lack of English competence or with other factors associated with cultural background.

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	<p>A person may have more than one Given name. All given names should be recorded.</p> <p>The agency or establishment should record the client's full given name(s) on their information systems.</p> <p>National Community Services Data Dictionary specific:</p> <p>In instances where there is uncertainty about which name to record for a person living in a remote Aboriginal or Torres Strait Islander community, Centrelink follows the practice of recording the Indigenous person's name as it is first provided to Centrelink. In situations where proof of identity is required, the name is recorded on a majority of the higher point scoring documents that are produced as proof of identity.</p> <p>National Health Data Dictionary specific:</p> <p>Each individual Given name should have a Given name sequence number associated with it.</p> <p>Health care establishments may record given names (first and other given names) in one field or several fields. This metadata item definition applies regardless of the format of data recording.</p> <p>A full history of names is to be retained.</p>
<i>Collection methods:</i>	This metadata item should be recorded for all clients.

Given name(s) should be recorded in the format preferred by the person. The format should be the same as that indicated by the person (eg written on a form) or in the same format as that printed on an identification card, such as Medicare card, to ensure consistent collection of name data.

It is acknowledged that some people use more than one given name (e.g. formal name, birth name, nick name or shortened name, or tribal name) depending on the circumstances. A person is able to change his or her name by usage in all States and Territories of Australia with the exception of Western Australia, where a person may only change his or her name under the Change of Name Act.

A person should generally be registered using their preferred name as it is more likely to be used in common usage and on subsequent visits to the agency or establishment. The person's preferred name may in fact be their legal (or Medicare card) name. The Person name type metadata item (see Comments) can be used to distinguish between the different types of names that may be used by the person.

The following format may assist with data collection:

What is the given name you would like to be known by?

Are you known by any other given names that you would like recorded?

If so, what are they

Please indicate the 'type' of given name that is to be recorded:

- (a) Medicare card name (if different to preferred name).
- (b) Alias (any other name that you are known by).

Whenever a person informs the agency or establishment of a change of given name (e.g. prefers to be known by their middle name), the former name should be recorded according to the appropriate name type. Do not delete or overwrite a previous given name e.g. 'Mary Georgina Smith' informs the hospital that she prefers to be known as 'Georgina'. Record 'Georgina' as her preferred given name and record 'Mary' as the Medicare card given name.

e.g. The establishment is informed that 'Baby of Louise Jones' has been named 'Mary Jones'. Retain 'Baby of Louise' as the newborn name and also record 'Mary' as the preferred 'Given name'.

Registering an unidentified health care client:

If the person is a health care client and her/his given name is not known record unknown in the 'Given name' field and use alias Name type. When the person's name becomes known, add the actual name as preferred Name type (or other as appropriate). Do not delete or overwrite the alias name of unknown.

Use of first initial:

If the person's given name is not known, but the first letter (initial) of the given name is known, record the first letter in the preferred 'Given name' field. Do not record a full stop following the initial.

Persons with only one name:

Some people do not have a **family** name and a given name: they have only one name by which they are known. If the person has only one name, record it in the 'Family name' field and leave the 'Given name' blank.

Record complete information:

All of the person's given names should be recorded.

Shortened or alternate first given name:

If the person uses a shortened version or an alternate version of their first given name, record their preferred name, the actual name as their Medicare card name and any alternative versions as alias names as appropriate.

Example – The person's given name is Jennifer but she prefers to be called Jenny. Record 'Jenny' as the preferred 'Given name' and 'Jennifer' as her Medicare card name.

Example – The person's given name is 'Giovanni' but he prefers to be called 'John'.

Record 'John' as the preferred 'Given name' and 'Giovanni' as the Medicare card name.

Punctuation:

If special characters form part of the given names they shall be included, e.g. hyphenated names shall be entered with the hyphen.

- Hyphen, e.g. Anne–Maree, Mary–Jane

Do not leave a space before or after the hyphen, i.e. between last letter of 'Anne' and the hyphen, nor a space between the hyphen and the first letter of 'Maree'.

- spaces, e.g. Jean Claude Carcel Moreaux

If the person has recorded their given name as more than one word, displaying spaces in between the words, record their given names in data collection systems in the same way (i.e. Jean Claude is one given name and Marcel is another given name).

Names not for continued use:

For cultural reasons, a person such as an Aboriginal or Torres Strait Islander may advise that they are no longer using the given name they previously used and are now using an alternative current name. Record their current name as their preferred given name and record their previously used name as an alias name (with a Name conditional use flag of 'not for continued use').

Composite name:

If a person identifies their first name as being a composite word, both parts should be recorded under the first Given Name (rather than the first and second Given Name).

e.g. 'Anne Marie Walker' notes her preferred Given Name to be 'Anne Marie', then 'Anne Marie' is recoded as (first) Given Name, and (second) Given Name is left blank.

Registering an unnamed newborn baby:

An unnamed (newborn) baby is to be registered using the mother's given name in conjunction with the prefix 'Baby of'. For example, if the baby's

mother's given name is Fiona, then record 'Baby of Fiona' in the preferred 'Given name' field for the baby. This name is recorded under the newborn Name type. If a name is subsequently given, record the new name as the preferred given name and retain the newborn name.

Registering unnamed multiple births:

An unnamed (newborn) baby from a multiple birth should use their mother's given name plus a reference to the multiple births. For example, if the baby's mother's given name is 'Fiona' and a set of twins is to be registered, then record 'Twin 1 of Fiona' in the Given name field for the first born baby, and 'Twin 2 of Fiona' in the 'Given name' field of the second born baby. Arabic numbers (1, 2, 3 ...) are used, not Roman Numerals (I, II, III).

In the case of triplets or other multiple births the same logic applies. The following terms should be use for recording multiple births:

- Twin:

use Twin i.e. Twin 1 of Fiona

- Triplet:

use Trip i.e. Trip 1 of Fiona

- Quadruplet:

use Quad i.e. Quad 1 of Fiona

- Quintuplet:

use Quin i.e. Quin 1 of Fiona

- Sextuplet:

use Sext i.e. Sext 1 of Fiona

- Septuplet:

use Sept i.e. Sept 1 of Fiona.

These names should be recorded under the newborn Person name type. When the babies are named, the actual names should be recorded as the preferred name. The newborn name is retained.

Aboriginal/Torres Strait Islander names not for continued use:

For cultural reasons, an Aboriginal or Torres Strait Islander may advise an agency or establishment that they are no longer using the given name that they had previously registered and are now using an alternative current name.

Record their current name as the preferred 'Given name' and record their previous used given name as an alias name.

Ethnic Names:

The Centrelink Naming Systems for Ethnic Groups publication provides the correct coding for ethnic names. Refer to Ethnic Names Condensed Guide for summary information.

Misspelled given names:

If the person's given name has been misspelled in error, update the Given name field with the correct spelling and record the misspelled given name as an Alias name. Recording misspelled names is important for filing documents that may be issued with previous versions of the client's name. Discretion should be used regarding the degree of recording that is maintained.

Comments:

Often people use a variety of names, including legal names, married/maiden names, nicknames, assumed names, traditional names, etc. Even small differences in recording – such as the difference between Thomas and Tom – can make Record linkage impossible. To minimise discrepancies in the recording and reporting of name information, agencies or establishments should ask the person for their full (formal) Given name and Family name. These may be different from the name that the person may prefer the agency or establishment workers to use in personal dealings. Agencies or establishments may choose to separately record the preferred name that the person wishes to be used by agency or establishment workers. In some cultures it is traditional to state the family name first. To overcome discrepancies in recording/reporting that may arise as a result of this practice, agencies or establishments should always ask the person to specify their first given name and their family or surname separately. These should then be recorded as Given name and Family name as appropriate, regardless of the order in which they may be traditionally given.

National Community Services Data Dictionary specific:

Selected letters of the given name in combination with selected letters of the family name, date of birth and sex may be used for **record linkage** for statistical purposes only.

National Health Data Dictionary specific:

Health care provider identification DSS and Health care client identification DSS

For the purpose of positive identification or contact, agencies or establishments that collect Given name should also collect Given name sequence number. Given name sequence number is also a metadata item in Australian Standard AS4846–2004 Health care provider identification and is proposed for inclusion in the review of Australian Standard AS5017–2002 Health care client identification. AS5017 and AS4846 use alternative alphabetic codes for Given name sequence number. Refer to the current standards for more details.

Collection and usage attributes

<i>Guide for use:</i>	<p>Code 1. Homeless: Homeless, for the purpose of the Commonwealth–State Housing Agreement (CSHA) priority access national standard, is defined as a household with no housing or a household residing in temporary or emergency accommodation at the time of housing allocation. It includes households who:</p> <ul style="list-style-type: none">• lived in accommodation provided by a Supported Accommodation Assistance Program (SAAP) agency or some other form of emergency accommodation;• were totally without permanent shelter (e.g. wandered from place to place, slept out on the street or on park benches);• lived in shelter that was unlawful such as those who were forced to squat in derelict buildings; or
-----------------------	---

- stayed temporarily with friends or relatives in the short term (e.g. up to a maximum of 6 weeks duration).

Code 2. Life or safety was at risk in their accommodation: This includes situations where people were:

- subject to domestic violence; or
- subject to sexual/emotional abuse; or
- subject to child abuse; or
- at risk of violence or who feared for their safety in the home environment.

Violence is defined as any incident involving the occurrence, attempt or threat of either physical or sexual assault. Physical assault involves the use of physical force with the intent to harm or frighten a person. The threat to harm should only be included if it is believed the harm is likely to be carried out. Sexual assault includes acts of a sexual nature against a person's will through the use of physical force, intimidation or coercion, or any attempts to do this.

Code 3. Health condition aggravated by housing: It includes people who lived in the following situations:

- Medical condition or **disability** which rendered their housing unsuitable (e.g. disabled person who required modified accommodation, elderly persons who were housebound due to mobility problems in highset dwellings);
- appropriate housing stock was either not available, or not available at an affordable cost, in the private rental market (e.g. dwellings with appropriate modifications for a person with a disability);
- a health condition or disability which was caused or exacerbated by the living situation.

Code 4. Housing inappropriate to needs: This category captures housing situations that indicate a person did not have access to safe and secure housing at the time of allocation and these situations are not included in categories 1 to 3 above (people with housing affordability issues are captured in category 5). Inappropriate housing includes persons who:

- lived in poor housing locations that resulted in isolation from community services, social networks and support systems, and these services and supports were necessary to maintain independent living. This category includes families that were divided due to their housing situation; or
- lived in overcrowded situations where an additional two bedrooms was required for adequate housing according to the **proxy occupancy standard**; or
- were unable to access accommodation in the private rental market due to discrimination. Discrimination refers to a person who was treated unfairly because they belonged to a particular group of people. Types of discrimination include: sex; race; age; marital status; sexual orientation; or disability (Anti-discrimination Board); or
- lived in situations where their tenure was insecure and they had received an eviction notice (either written or verbal) and they had no access to adequate legislative protection; or
- lived in housing that had severe structural or other maintenance problems (e.g. property had been declared unfit for human habitation, severe dampness, lacked essential facilities such as cooking or bathroom).

Code 5. Very high housing costs: This category identifies households that paid 41% or more of their income in rent at the time of housing allocation.

This definition is not intended to suggest that households paying between 30–41% of income on rent live in affordable housing situations. The definition aims to capture the group of the population who experience the more severe end of housing affordability problems and the group for which literature suggests are least able to decrease their housing costs.

Source and reference attributes

Submitting organisation: National Housing Data Development Committee

Data element attributes

Collection and usage attributes

Collection methods: More than one greatest need reason can be recorded for a household.

In counting the total number of greatest need households, each household should only be counted once.

Comments: The definition of 'homeless' used here for the purposes of the Commonwealth–State Housing Agreement priority access national standard is different to the SAAP **Homeless** definition.

It should be noted that as housing assistance allocation practices vary across:

- states and territories within a collection
- across data collections within states and territories

caution should be used when interpreting information and/or making comparisons in relation to this metadata item.

Gross capital expenditure—non-financial assets

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Housing assistance agency—gross capital expenditure (expenditure on non-financial assets), total Australian currency N[N(9)]
<i>METeOR identifier:</i>	305319
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006
<i>Definition:</i>	Total expenditure on non-financial assets (Economic Type Framework Classification code 222).

Data element concept attributes

<i>Data element concept:</i>	Housing assistance agency—gross capital expenditure (expenditure on non-financial assets)
<i>Definition:</i>	Net expenditure on new and second-hand fixed assets, land and intangible assets excluding capitalised interest.
<i>Context:</i>	To enable analysis of welfare expenditure at the national level. There is a considerable interest in expenditure data at the national level from many different potential users. This metadata item is based on relevant sections of the Economic Type Framework Classification (ETF) within the Australian Bureau of Statistics (ABS) Australian System of Government Finance Statistics (GFS). The GFS summarises the broad reporting requirements of government bodies for Public Sector Accounts. As part of these reporting requirements, governments need to obtain certain information from funded organisations. This metadata item is presented in the interests of facilitating reporting. The ETF is based on established accounting principles and specifies an operating statement, cash flow statement, reconciliation statement, supplementary statement, intra-unit transfers other than revaluations and accrued transactions, revaluations and other changes in the volume of assets and, a balance sheet.
<i>Object class:</i>	Housing assistance agency
<i>Property:</i>	Gross capital expenditure

Collection and usage attributes

Guide for use: A household should at least contain a member that is 16 years of age or more. If a household does not contain at least one member 16 years of age or over, it should be classified as Unknown.

A dependant is defined as someone who lives in the primary care of parent(s), carer or guardian, is aged 24 years and under and:

- is studying full-time (ages 5 and over); and/or
- is not in receipt of a pension, payment or benefit (e.g. Youth Allowance) or a Prescribed Education Scheme payment (e.g. ABSTUDY); and/or
- has an annual income of no more than the amount specified by Centrelink for basic eligibility for Family Tax Benefit Part A.

A family is defined as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or defacto), adoption,

step or fostering, and who are usually resident in the same household.

Code 1.5. Family (with non-related member(s) present): Can include people who are not related to the primary family, but are a family themselves.

Code 9. Not stated/inadequately described: Includes not available, not collected, not classifiable, not stated, and inadequately described.

Data element attributes

Collection and usage attributes

Guide for use:

It should be noted that only usual residents of a household are considered when describing and categorising households by Household type. Visitors to a household are, by definition, excluded from the household. Usual residence of members of a household is defined as '...that address at which the person has lived or intends to live for a total of 6 months or more' (Census Dictionary 1996).

Other households, including multiple family households may be broken down further to show households with only family members present and those with non-family members present. A family household with only family members present is a household where every individual forms a familial relationship to one of the families belonging to the household. This relates to the ABS Household type definition.

Comments:

For the ABS the household is analysed on the basis of the existence or non-existence of family structure and the presence of unrelated household members, rather than on the basis of sex or age, for example

<i>Classification scheme:</i>	Postcode datafile
<i>Representation class:</i>	Code
<i>Data type:</i>	Number
<i>Format:</i>	{NNNN}
<i>Maximum character length:</i>	4

Collection and usage attributes

<i>Comments:</i>	Postcode – Australian may be used in the analysis of data on a geographical basis, which involves a conversion from postcodes to the Australian Bureau of Statistics (ABS) postal areas. This conversion results in some inaccuracy of information. However, in some data sets postcode is the only geographic identifier, therefore the use of other more accurate indicators (e.g. Statistical Local Area (SLA)) is not always possible.
------------------	--

When dealing with aggregate data, postal areas, converted from postcodes, can be mapped to Australian Standard Geographical Classification codes using an ABS concordance, for example to determine SLAs. It should be noted that such concordances should not be used to determine the SLA of any individual's postcode. Where individual street addresses are available, these can be mapped to ASGC codes (e.g. SLAs) using the ABS National Localities Index (NLI).

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	Geographic postcodes showing location or suburb should be used. Special postcodes for organisations, e.g. postal box postcodes, should not be used.

Comments: This item is included in the following housing assistance data collections:

National Reporting Framework for Indigenous housing

In the National Reporting Framework for Indigenous housing data collection a housing management plan should contain:

- objectives for housing assistance delivery
- an asset management plan, including client consultation and feedback mechanisms and appropriate information and training for tenants to ensure tenants' responsibilities are understood and their rights protected

- rent collection policies and systems
- financial practices and reporting systems that link resources to outcomes.

Collection and usage attributes

<i>Guide for use:</i>	Always include the cent value, using .00 where there are only dollar values.
-----------------------	--

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	The main components of assessable income are:
-----------------------	---

- wages and salary;
- income derived from self–employment;
- government pensions, benefits and allowances; and
- other income comprising investments (including interest, dividends, royalties and rent) and other regular income (including superannuation, private scholarships received in cash, workers' compensation, accident compensation, maintenance or alimony, and any other allowances regularly received).

Assessable income is also used to calculate the rental housing rebate, that allows a household to pay a rent lower than the market rent.

Each state and territory uses its own definition of 'assessable income'.

Where household or income unit assessable income is required, then assessable income of each person is summed.

Indigenous household

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Household—Indigenous status, code N
<i>METeOR identifier:</i>	302953
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006
<i>Definition:</i>	A code that represents whether a household is an Indigenous household.

Data element concept attributes

<i>Data element concept:</i>	Household—Indigenous status
<i>Definition:</i>	Whether a household is an Indigenous household.
<i>Context:</i>	Together with family , household is considered one of the basic groups of social aggregation. Information on household numbers and composition aids in identifying groups within the population such as Indigenous households or the number of people living alone.

Australia's Aboriginal and Torres Strait Islander peoples occupy a unique place in Australian society and culture. In the current climate of reconciliation, accurate and consistent statistics about Aboriginal and Torres Strait Islander peoples are needed in order to plan, promote and deliver essential services, to monitor changes in wellbeing and to account for government expenditure in this area.

<i>Object class:</i>	Household
<i>Property:</i>	Indigenous status

Collection and usage attributes

<i>Guide for use:</i>	An Indigenous household is one which contains one or more Indigenous people.
-----------------------	--

This definition may not be consistent with eligibility requirements for assistance targeted to Indigenous people under a specific program. For example, some programs specify that there must be an Indigenous person aged 15 or over to be classified as an Indigenous household.

A household excludes visitors to a household.

<i>Technical name:</i>	Person—Indigenous status, Housing assistance Indigenous status code N{.N}
<i>METeOR identifier:</i>	270380
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005

Data element concept attributes

<i>Data element concept:</i>	Person—Indigenous status
<i>Definition:</i>	Indigenous Status is a measure of whether a person identifies as being of Aboriginal or Torres Strait Islander origin. This is in accord with the first two of three components of the Commonwealth definition.
<i>Context:</i>	Australia's Aboriginal and Torres Strait Islander peoples occupy a unique place in Australian society and culture. In the current climate of reconciliation, accurate and consistent statistics about Aboriginal and Torres Strait Islander peoples are needed in order to plan, promote and deliver essential services, to monitor changes in wellbeing and to account for government expenditure in this area. The purpose of this metadata item is to provide information about people who identify as being of Aboriginal or Torres Strait Islander origin. Agencies or establishments wishing to determine the eligibility of individuals for particular benefits, services or rights will need to make their own judgments about the suitability of the standard measure for these purposes, having regard to the specific eligibility criteria for the program concerned.

Collection and usage attributes

Guide for use: This metadata item is based on the ABS Standard for Indigenous Status. For detailed advice on its use and application please refer to the ABS Website as indicated in the Origin section.

The classification for 'Indigenous Status' has a hierarchical structure comprising two levels. There are four categories at the detailed level of the classification which are grouped into two categories at the broad level. There is one supplementary category for 'not stated' responses. The classification is as follows:

Indigenous:

- Aboriginal but not Torres Strait Islander Origin

- Torres Strait Islander but not Aboriginal Origin
- Both Aboriginal and Torres Strait Islander Origin

Non-indigenous:

- Neither Aboriginal nor Torres Strait Islander Origin

Not stated/inadequately described:

The not stated/inadequately described category is not to be available as a valid answer to the questions but is intended for use:

- primarily when importing data from other data collections that do not contain mappable data;
- where an answer was refused;
- where the question was not able to be asked prior to completion of assistance because the client was unable to communicate or a person who knows the client was not available.

Only in the last two situations may the tick boxes on the questionnaire be left blank.

Collection methods:

The standard question for Indigenous Status is as follows:

[Are you] [Is the person] [Is (name)] of Aboriginal or Torres Strait Islander origin?

(For persons of both Aboriginal and Torres Strait Islander origin, mark both 'Yes' boxes.)

No.....

Yes, Aboriginal.....

Yes, Torres Strait Islander.....

This question is recommended for self-enumerated or interview-based collections. It can also be used in circumstances where a close relative, friend, or another member of the household is answering on behalf of the subject.

When someone is not present, the person answering for them should be in a position to do so, i.e. this person must know the person about whom the question is being asked well and feel confident to provide accurate information about them. However, it is strongly recommended that this question be asked directly wherever possible.

This question must always be asked regardless of data collectors' perceptions based on appearance or other factors.

The Indigenous status question allows for more than one response. The procedure for coding multiple responses is as follows:

If the respondent marks 'No' and either 'Aboriginal' or 'Torres Strait Islander', then the response should be coded to either Aboriginal or Torres Strait Islander as indicated (i.e. disregard the 'No' response).

If the respondent marks both the 'Aboriginal' and 'Torres Strait Islander' boxes, then their response should be coded to 'Both Aboriginal and Torres Strait Islander Origin'.

If the respondent marks all three boxes ('No', 'Aboriginal' and 'Torres Strait Islander'), then the response should be coded to 'Both Aboriginal and Torres

Strait Islander Origin' (i.e. disregard the 'No' response).

This approach may be problematical in some data collections, for example when data are collected by interview or using screen based data capture systems. An additional response category

Yes, both Aboriginal and Torres Strait Islander.....

May be included if this better suits the data collection practices of the agency or establishment concerned.

There has been some controversy over the issue of whether South Sea Islanders need to be included in the definition of Aboriginal or Torres Strait Islander. The ABS clearly states that South Sea Islanders are not Indigenous and should therefore be coded accordingly. Subsequently, South Sea Islanders are to be coded under category 2 'Neither Aboriginal or Torres Strait Islander origin'.

Data element attributes

Collection and usage attributes

Comments:

Some service providers may find it difficult to ask a question about a person's Indigenous status. Furthermore, some Indigenous persons may be reluctant to answer a question about their Indigenous status because previous experience has led them to believe that identifying as an Indigenous person may disadvantage them. Without assistance with implementing this data element the data provided are likely to be of low validity and reliability.

Presently, the CSHA data collections do not differentiate between Aboriginal and Torres Strait Islander origin. Commonly, the question asked is 'Does the person (client) identify themselves as an Aboriginal or Torres Strait Islander?' and the possible responses are Yes/No/Not known.

This does not conform with the ABS national standard, which incorporates the more detailed data domains of:

1. Aboriginal but not Torres Strait Islander origin
2. Torres Strait Islander but not Aboriginal origin
3. Both Aboriginal and Torres Strait Islander origin
4. Neither Aboriginal nor Torres Strait Islander origin
9. Not stated/inadequately described

It is also not possible to map the CSHA response of 'Indigenous – not further defined' to the ABS standard.

The following definition, commonly known as 'The Commonwealth Definition' was given in a High Court judgement in the case of *Commonwealth v Tasmania* (1983) 46 ALR 625.

'An Aboriginal or Torres Strait Islander is a person of Aboriginal or Torres Strait Islander descent who identifies as an Aboriginal or Torres Strait Islander and is accepted as such by the community in which he or she lives'.

There are three components to the Commonwealth definition:

- descent;
- self-identification; and
- community acceptance.

Collection and usage attributes

<i>Guide for use:</i>	CODE 1 Employed: Persons aged 15 years and over who, during the reference week: (a) worked for one hour or more for pay, profit, commission or payment in kind in a job or business, or on a farm (comprising 'Employees', 'Employers' and 'Own Account Workers'); or (b) worked for one hour or more without pay in a family business or on a farm (i.e. 'Contributing Family Worker'); or (c) were 'Employees' who had a job but were not at work and were: <ul style="list-style-type: none">• on paid leave• on leave without pay, for less than four weeks, up to the end of the reference week• stood down without pay because of bad weather or plant breakdown at their place of employment, for less than four weeks up to the end of the reference week• on strike or locked out
-----------------------	--

- on workers' compensation and expected to be returning to their job, or
- receiving wages or salary while undertaking full-time study; or

(d) were 'Employers', 'Own Account Workers' or 'Contributing Family Workers' who had a job, business or farm, but were not at work.

CODE 2 Unemployed:

Unemployed persons are those aged 15 years and over who were not employed during the reference week, and:

(a) had actively looked for full-time or part-time work at any time in the four weeks up to the end of the reference week. Were available for work in the reference week, or would have been available except for temporary illness (i.e. lasting for less than four weeks to the end of the reference week). Or were waiting to start a new job within four weeks from the end of the reference week and would have started in the reference week if the job had been available then; or

(b) were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the reference week (including the whole of the reference week) for reasons other than bad weather or plant breakdown. Note: Actively looking for work includes writing, telephoning or applying in person to an employer for work. It also includes answering a newspaper advertisement for a job, checking factory or job placement agency notice boards, being registered with a job placement agency, checking or registering with any other employment agency, advertising or tendering for work or contacting friends or relatives.

CODE 3 Not in the Labour Force:

Persons not in the labour force are those persons aged 15 years and over who, during the reference week, were not in the categories employed or unemployed, as defined. They include persons who were keeping house (unpaid), retired, voluntarily inactive, permanently unable to work, persons in institutions (hospitals, gaols, sanatoriums, etc.), trainee teachers, members of contemplative religious orders, and persons whose only activity during the reference week was jury service or unpaid voluntary work for a charitable organisation.

Low income status

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Household—low income status, code N
<i>METeOR identifier:</i>	302506
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006

Data element concept attributes

<i>Data element concept:</i>	Household—low income status
<i>Definition:</i>	The low income status of a household receiving housing assistance.
<i>Context:</i>	A guiding principle of the 1999 Commonwealth–State Housing Agreement (CSHA) is that assistance is to be provided to those who most need it, for the duration of their need. Households who most need assistance are defined as those whose needs cannot be met by the private rental market. The low income performance indicator measures households most in need in terms of tenants who have low income or special needs that would not find appropriate, affordable and secure housing in the private rental market.
<i>Object class:</i>	Household
<i>Property:</i>	Low income status

Collection and usage attributes

<i>Guide for use:</i>	The household income cut off measures used for this metadata item have been developed in relation to statutory government income support payments.
-----------------------	--

Code 1. The Low income A:

Income equivalent to or below 100% of the government income support benefits at the pensioner rate. The pensioner (single & couple) benefit rate has been selected as the low income A household cut-off measure, as pension rates are higher than allowance rates (e.g. unemployment benefits). The selection of the higher benefit rate should allow all persons receiving up to or equivalent to 100% government income support benefits (e.g. pensioners, unemployed, youth allowance, etc.) to be captured within the *low income A* household cut-off measure.

It should be noted that this group might include some income earners, provided their total income is not greater than 100% of the pensioner rate of government income support benefits. This is especially likely for young people who are working, as the government allowance rates for young people are lower than those for pensioners and young people would need to be employed to have an equivalent income.

Code 2. Low income B:

Income above 100% of government income support benefits at the pensioner rate but not greater than the cut-off for receiving this benefit. In practice it is the maximum income level at which you can receive a part pension or (for households with dependent children) more than the base rate of Family Tax Benefit Part A.

For further information on calculating low income status see the most recent Commonwealth State Housing Agreement (CSHA) Public rental housing data manual on the AIHW website:

http://www.aihw.gov.au/housing/assistance/data_collections/index.cfm

For the CSHA community housing data collection, the low income measure is based on only the 'Low income B' cut-offs.

<i>Representation class:</i>	Code
<i>Data type:</i>	Number
<i>Format:</i>	NN{NN}
<i>Maximum character length:</i>	4

Collection and usage attributes

Guide for use: The Australian Standard Classification of Languages (ASCL) has a three-level hierarchical structure. The most detailed level of the classification consists of base units (languages) which are represented by four-digit codes. The second level of the classification comprises narrow groups of languages (the Narrow Group level), identified by the first two digits. The most general level of the classification consists of broad groups of languages (the Broad Group level) and is identified by the first digit. The classification includes Australian Indigenous languages and sign languages.

For example, the Lithuanian language has a code of 3102. In this case 3 denotes that it is an Eastern European language, while 31 denotes that it is a Baltic language. The Pintupi Aboriginal language is coded as 8713. In this case 8 denotes that it is an Australian Indigenous language and 87 denotes that the language is Western Desert language.

Language data may be output at the Broad Group level, Narrow Group level or base level of the classification. If necessary significant Languages within a Narrow Group can be presented separately while the remaining Languages in the Narrow Group are aggregated. The same principle can be adopted to highlight significant Narrow Groups within a Broad Group.

Data element attributes

Collection and usage attributes

Collection methods:

Recommended question:

Do you/Does the person/Does (name) speak a language other than English at home? (If more than one language, indicate the one that is spoken most often.)

No (English only) _____

Yes, Italian _____

Yes, Greek _____

Yes, Cantonese _____

Yes, Mandarin _____

Yes, Arabic _____

Yes, Vietnamese _____

Yes, German _____

Yes, Spanish _____

Yes, Tagalog (Filipino) _____

Yes, Other (please specify) _____

This list reflects the nine most common languages other than English spoken in Australia.

Languages may be added or deleted from the above short list to reflect characteristics of the population of interest.

Alternatively a tick box for 'English' and an 'Other – please specify' response category could be used.

Comments:

This metadata item is consistent with that used in the Australian Census of Population and Housing and is recommended for use whenever there is a requirement for comparison with Census data.

This data element is important in identifying those people most likely to suffer disadvantage in terms of their ability to access services due to language and/or cultural difficulties. In conjunction with Indigenous status, Proficiency in spoken English and Country of birth this data element forms the minimum core set of cultural and language indicators recommended by the Australian Bureau of Statistics (ABS).

Data on main language other than English spoken at home are regarded as an indicator of 'active' ethnicity and also as useful for the study of inter-generational language retention. The availability of such data may help providers of health and community services to effectively target the geographic areas or population groups that need those services. It may be used for the investigation and development of language services such as interpreter/ translation services.

<i>Data type:</i>	Number
<i>Format:</i>	N[NNN]{-NN}
<i>Maximum character length:</i>	6

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	This metadata item can be used to code the main occupation of persons involved in an event. Caution is advised in its use with regard to service providers as their activity as a service provider may not be their main occupation.
<i>Collection methods:</i>	<p>This metadata item should only be collected from people whose Labour force status is employed.</p> <p>Occupation is too complex and diverse an issue to fit neatly into any useable small group of categories. Therefore ABS recommend that this metadata item be collected by using the following two open-ended questions:</p> <p>Q1. In the main job held last week (or other recent reference period), what was your/the person's occupation?</p> <p>Q2. What are the main tasks that you/the person usually perform(s) in that occupation? The information gained from these two questions can then be used to select an appropriate code from the ASCO at any of the available levels (see Guide for use section).</p> <p>If only one question is asked, question one should be used. The use of question one only, however, sometimes elicits responses which do not provide a clear occupation title and specification of tasks performed. As a result accurate coding at unit group or occupation level may not be possible.</p> <p>While agencies are encouraged to use the recommended question described above, it is acknowledged that this is not always possible in practice. For example, where the data collection is a by-product of the provision of a</p>

health or community service, the information may be ascertained using different means. However, due to the complexities of the metadata item 'Main occupation of person', this will result in inaccurate information. The recommended question should be used wherever possible.

Comments:

This metadata item may be useful in gaining an understanding of a clients situation and needs. For example, the occupation of a person with a disability may be directly relevant to the type of aids that they require.

National Health Data Dictionary (NHDD) specific:

Injury surveillance – There is considerable user demand for data on occupation-related injury and illness, including from Worksafe Australia and from industry, where unnecessary production costs are known in some areas and suspected to be related to others in work-related illness, injury and disability.

Collection and usage attributes

<i>Guide for use:</i>	Refers to the current marital status of a person. CODE 2 Widowed This code usually refers to registered marriages but when self reported may also refer to de facto marriages. CODE 4 Separated This code refers to registered marriages but when self reported may also refer to de facto marriages.
-----------------------	---

CODE 5 Married (registered and de facto)

Includes people who have been divorced or widowed but have since re-married, and should be generally accepted as applicable to all de facto couples, including of the same sex.

CODE 6 Not stated/inadequately described

This code is not for use on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.

Source and reference attributes

Origin:

The ABS standards for the collection of Social and Registered marital status appear on the ABS Website. Australian Bureau of Statistics. Family, household and income unit variables. Cat. no. 1286.0. Canberra: ABS.

Data element attributes

Collection and usage attributes

Collection methods:

This metadata item collects information on social marital status. The recommended question module is:

Do you/Does the person usually live with a partner in a registered or de facto marriage?

Yes, in a registered marriage

Yes, in a defacto marriage

No, never married

No, separated

No, divorced

No, widowed

It should be noted that information on marital status is collected differently by the ABS, using a set of questions. However, the question outlined above is suitable and mostly sufficient for use within the health and community services fields. See Source document for information on how to access the ABS standards.

While agencies are encouraged to use the recommended question described above, it is acknowledged that this is not always possible in practice. For example, where the data collection is a by-product of the provision of a health or community service, the information may be ascertained using different means. However, the recommended question should be used wherever practically possible.

Comments:

The ABS standards identify two concepts of marital status:

- Registered marital status – defined as whether a person has, or has had, a registered marriage;
- Social marital status – based on a person's living arrangement (including de facto marriages), as reported by the person.

It is recommended that the social marital status concept be collected when information on social support/home arrangements is sought, whereas the registered marital status concept need only be collected where it is specifically required for the purposes of the collection.

While marital status is an important factor in assessing the type and extent of support needs, such as for the elderly living in the home environment, marital status does not adequately address the need for information about social support and living arrangement and other data elements need to be formulated to capture this information.

<i>Unit of measure precision:</i>	2

Collection and usage attributes

<i>Guide for use:</i>	Always include the cent value, using .00 where there are only dollar values.
-----------------------	--

Data element attributes

Collection and usage attributes

<i>Collection methods:</i>	The optimum method of assigning a market rent value to a dwelling is to have it assessed by the Australian Valuation Office (or another independent valuer). Preferably each dwelling should be re-assessed every 2 years as market rent values can change substantially over time. In some larger jurisdictions a sample of houses are periodically assessed for their market rent value as it is not practical to assess every dwelling.
----------------------------	--

Market rent is typically recorded on a weekly basis, and for the National Commonwealth–State Housing Agreement public rental housing and state owned and managed Indigenous housing data collections, is recorded as market rent value for which a rent was charged for the week of 30 June.

<i>Comments:</i>	Guidelines should be developed for assessing the market rent of modified dwellings (as for disabled and frail aged people) and dwellings in remote areas where there is not usually a private rental market. One option could be to calculate the cost of replacing the dwelling, then using a percentage of that as the market rent. However in remote areas where building costs can be high, this method could lead to inappropriately high market rents.

Postcode—Australian (person)

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person (address)—Australian postcode, code (Postcode datafile) {NNNN}
<i>METeOR identifier:</i>	287224
<i>Registration status:</i>	NHIG, Standard 04/05/2005 NCSIMG, Standard 25/08/2005 NHDAMG, Standard 10/02/2006
<i>Definition:</i>	The numeric descriptor for a postal delivery area, aligned with locality, suburb or place for the address of a person.

Data element concept attributes

<i>Data element concept:</i>	Person (address)—Australian postcode
<i>Definition:</i>	The numeric descriptor for a postal delivery area, aligned with locality, suburb or place for the address of a person.
<i>Context:</i>	Postcode is an important part of a person's postal address and facilitates written communication. It is one of a number of geographic identifiers that can be used to determine a geographic location. Postcode may assist with uniquely identifying a person.
<i>Object class:</i>	Person
<i>Property:</i>	Australian postcode

Value domain attributes

Representational attributes

<i>Classification scheme:</i>	Postcode datafile
<i>Representation class:</i>	Code
<i>Data type:</i>	Number
<i>Format:</i>	{NNNN}
<i>Maximum character length:</i>	4

Collection and usage attributes

<i>Comments:</i>	Postcode – Australian may be used in the analysis of data on a geographical basis, which involves a conversion from postcodes to the Australian Bureau of Statistics (ABS) postal areas. This conversion results in some inaccuracy of information. However, in some data sets postcode is the only geographic identifier, therefore the use of other more accurate indicators (e.g. Statistical Local Area (SLA)) is not always possible.
------------------	--

When dealing with aggregate data, postal areas, converted from postcodes, can be mapped to Australian Standard Geographical Classification codes using an ABS concordance, for example to determine SLAs. It should be noted that such concordances should not be used to determine the SLA of any individual's postcode. Where individual street addresses are available, these can be mapped to ASGC codes (e.g. SLAs) using the ABS National Localities Index (NLI).

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	The postcode book is updated more than once annually as postcodes are a dynamic entity and are constantly changing.
<i>Collection methods:</i>	Leave Postcode – Australian blank for: <ul style="list-style-type: none">• Any overseas address• Unknown address• No fixed address.

May be collected as part of Address line or separately. Postal addresses may be different from where a person actually resides.

<i>Guide for use:</i>	CODE 0 Not applicable (persons under 5 years of age or who speak only English) Not applicable, is to be used for people under 5 year of age and people who speak only English. CODE 9 Not stated/inadequately described Not stated/inadequately described, is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.
<i>Comments:</i>	The ABS advises that the most useful information provided by this metadata item is in the distinction between the two category groups of Very well/Well and Not well/Not at all.

Source and reference attributes

<i>Reference documents:</i>	Standards for Statistics on Cultural and Language Diversity 1999. Cat. no. 1289.0. Canberra: ABS.
-----------------------------	---

Data element attributes

Collection and usage attributes

Collection methods:

This metadata item is only intended to be collected if a person has a main language other than English spoken at home; and/or first language spoken is not English.

Recommended question:

How well do you speak English? (tick one)

1. Very well

2. Well

3. Not well

4. Not at all

Generally this would be a self-reported question, but in some circumstances (particularly where a person does not speak English well) assistance will be required in answering this question. It is important that the person's self-assessed proficiency in spoken English be recorded wherever possible. This metadata item does not purport to be a technical assessment of proficiency but is a self-assessment in the four broad categories outlined above.

This metadata item is not relevant to and should not be collected for persons under the age of five years.

While agencies are encouraged to use the recommended question described above, it is acknowledged that this is not always possible in practice. For example, where the data collection is a by-product of the provision of a health or community service, the information may be ascertained using different means. However, this standard should be used wherever practically possible.

Comments:

This metadata item identifies those people who may suffer disadvantage in terms of their ability to access services due to lack of ability in the spoken English language. This information can be used to target the provision of services to people whose lack of ability in spoken English is potentially a barrier to gaining access to government programs and services.

In conjunction with Indigenous status, the main language other than English spoken at home and the country of birth, this metadata item forms the minimum core set of cultural and language indicators recommended by the Australian Bureau of Statistics.

Qualification status

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Person—qualification status, code N
<i>METeOR identifier:</i>	292354
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006
<i>Definition:</i>	Whether the person has completed, or is undertaking a qualification.

Data element concept attributes

<i>Data element concept:</i>	Person—qualification status
<i>Definition:</i>	Formal certification, issued by a relevant approved body, in recognition that a person has achieved learning outcomes or competencies relevant to identified individual, professional, industry or community needs.
<i>Context:</i>	To assist in the analysis of staffing inputs and requirements of different organisations.
<i>Object class:</i>	Person
<i>Property:</i>	Qualification status

Collection and usage attributes

Guide for use: The Australian Qualifications Framework (AQF) is a single, coherent framework for qualifications from Senior Secondary Certificates through to Doctoral Degrees. The framework links together all these qualifications and is a quality-assured national system of educational recognition that promotes lifelong learning and a seamless and diverse education and training system.

It covers qualifications issued by secondary schools, vocational education and training (VET) providers and higher education institutions. All qualifications are nationally recognised. Within the framework there are six VET qualifications available: Certificates I, II, III and IV; Diploma and Advanced Diploma.

For the purposes of qualifications, the vocational education and training sector defines 'competency' as the possession and application of both knowledge and skills to defined standards, expressed as outcomes, that correspond to relevant workplace requirements and other vocational needs.

Individuals issued with qualifications will also receive documentation that identifies the units of competency that have been achieved when training is based on nationally endorsed competency standards.

Individuals who complete only some of the requirements for the qualification will receive a Statement of Attainment. A Statement of Attainment is a record of recognised learning which, although falling short of a qualification, may contribute towards a qualification outcome, either as partial completion of a course leading to a qualification, attainment of competencies, or completion of nationally accredited short course which may accumulate towards a qualification.

The Statement of Attainment will include, either on the Statement itself or as an attachment, the whole units of competency that have been achieved when training is based on nationally endorsed competency standards.

Collection and usage attributes

<i>Guide for use:</i>	CODE 9 Not stated/inadequately described
	This code is not for use in primary data collections.

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	<p>Code 1 Yes: Record if the household receiving housing assistance who as part of the assistance, pay less than the market rent value of the dwelling.</p> <p>Code 2 No: Record if the household receiving housing assistance who as part of the assistance, do not pay less than the market rent value of the dwelling.</p> <p>For example, a public housing dwelling may be assessed as having a market rent value of \$200 per week. On assessing the applicant household though, the State housing authority calculates that this household should pay no more than \$100 per week on rent. If this household is then allocated to this dwelling with a rent of \$100, (while the market rent value is \$200), then the household is considered to be rebated.</p>
<i>Collection methods:</i>	For those jurisdictions who use a 'full rent' concept, a rebated household is one which pays less than full rent.

Recurrent expenditure (administration costs)

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Housing assistance agency—recurrent expenditure (administration costs), total Australian currency N[N(9)]
<i>METeOR identifier:</i>	305363
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006
<i>Definition:</i>	Total administration costs.

Data element concept attributes

<i>Data element concept:</i>	Housing assistance agency—recurrent expenditure (administration costs)
<i>Definition:</i>	Administration costs refer to those costs associated with the administration offices of the property manager and the tenancy manager. They include the general accounting and personnel function costs relating to:

- employee expenses (e.g. wages and salaries, superannuation contributions, compensation, accrued leave, payroll tax, training)
- supplies and services expenses (includes stationery, postage, telephone, office equipment, information technology, vehicle expenses, insurance)
- grants and subsidies (excluding rental subsidies)

<i>Object class:</i>	Housing assistance agency
<i>Property:</i>	Recurrent expenditure

Value domain attributes

Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Currency
<i>Format:</i>	N[N(9)]
<i>Maximum character length:</i>	10
<i>Unit of measure:</i>	Australian currency (AU\$)
<i>Unit of measure precision:</i>	0

Data element attributes

Collection and usage attributes

<i>Collection methods:</i>	Administration costs are typically measured for a financial year (1 July to 30 June the following year).
----------------------------	--

The administration costs relate to the administration of the rental property and tenancy manager components of the agency's (or agencies') operation and should not include administration costs involved in other areas of operation.

The following cost items should be excluded from the calculation:

- rental subsidies;
- capitalised administration costs;
- depreciation;
- bond loans;
- profit/loss on sale;
- cost of sales.

This metadata item is used to calculate Direct cost per unity (P8) in the Commonwealth–State Housing Agreement (CSHA) Performance Indicator Framework.

For community housing administration costs can be to the administrator (i.e. state or territory body responsible for administering CSHA community housing programs) and the community housing provider.

<i>METeOR identifier:</i>	304174
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006
<i>Definition:</i>	Total expenditure on capital transfer expenses (Economic Type Framework Classification code 125).

Data element concept attributes

<i>Data element concept:</i>	Housing assistance agency—recurrent expenditure (capital transfer expenses)
<i>Definition:</i>	Unrequited payments of a capital nature that are usually non–recurrent and irregular for donor or recipient.
<i>Context:</i>	To enable analysis of welfare expenditure at the national level.

There is a considerable interest in expenditure data at the national level from many different potential users.

This metadata item is based on relevant sections of the Economic Type Framework Classification (ETF) within the Australian Bureau of Statistics (ABS) Australian System of Government Finance Statistics (GFS). The GFS summarises the broad reporting requirements of government bodies for Public Sector Accounts. As part of these reporting requirements, governments need to obtain certain information from funded organisations. This metadata item is presented in the interests of facilitating reporting.

The ETF is based on established accounting principles and specifies an operating statement, cash flow statement, reconciliation statement, supplementary statement, intra–unit transfers other than revaluations and accrued transactions, revaluations and other changes in the volume of assets and, a balance sheet.

<i>Object class:</i>	Housing assistance agency
<i>Property:</i>	Recurrent expenditure

<i>Data element concept:</i>	Housing assistance agency—recurrent expenditure (depreciation and amortisation)
<i>Definition:</i>	The accounting process by which the cost of assets are written off over time. Depreciation and amortisation charges are allocations of the cost of assets over their useful life.
<i>Context:</i>	<p>To enable analysis of welfare expenditure at the national level.</p> <p>There is a considerable interest in expenditure data at the national level from many different potential users.</p> <p>This metadata item is based on relevant sections of the Economic Type Framework Classification (ETF) within the Australian Bureau of Statistics (ABS) Australian System of Government Finance Statistics (GFS). The GFS summarises the broad reporting requirements of government bodies for Public Sector Accounts. As part of these reporting requirements, governments need to obtain certain information from funded organisations. This metadata item is presented in the interests of facilitating reporting.</p> <p>The ETF is based on established accounting principles and specifies an operating statement, cash flow statement, reconciliation statement, supplementary statement, intra-unit transfers other than revaluations and accrued transactions, revaluations and other changes in the volume of assets and, a balance sheet.</p>
<i>Object class:</i>	Housing assistance agency
<i>Property:</i>	Recurrent expenditure

Collection and usage attributes

<i>Guide for use:</i>	For more explanation of and details on expenditure types, see the Detailed Economic Type Framework Classification in Australian System of Government Finance Statistics: Concepts, Sources and Methods, 2005.
<i>Comments:</i>	When fees charged for goods and services are offset against recurrent expenditure, the result equates to final consumption expenditure in the ABS national accounts framework.

Data element attributes

Collection and usage attributes

Guide for use:

Depreciation usually relates to non-current tangible assets which are written off because they wear out or become obsolete and includes the calculation of depreciation of stock. Depreciation is usually calculated as per the Australian Accounting Standards at the 1/50th rate.

Amortisation usually relates to consumption of non-produced assets.

For the Commonwealth–State Housing Agreement National Financial Reporting Framework the following direct expenses are included:

- Depreciation and amortisation

Collection methods:

Measurement on an accrual accounting basis is preferred to measurement on a cash accounting basis.

Expenditure is usually measured for an accounting period, typically a financial year (1 July to 30 June the following year).

Data element attributes

Collection and usage attributes

Guide for use:

Non–employee expenses include: provision for doubtful debts, bad debts written off (not previously provided), benefits to households in goods and services, production tax expenses and other non–employee expenses, e.g. purchase of goods and services by general government and public enterprises and from abroad, rentals for the use of buildings or the right to use copyrights, patents, trademarks, etc., supplies and services expenses, for example property management costs such as the amount payable to local government or equivalent authority for rates for housing rental properties.

Non–employee expenses exclude: depreciation and amortisation expenses (123), purchases which are charged to capital works (e.g. own–account construction) and interest and finance lease payments.

In the Commonwealth–State Housing Agreement National Financial Reporting Framework the following direct expenses items are included:

- Supplies and services
- Housing maintenance

Collection methods:

Measurement on an accrual accounting basis is preferred to measurement on a cash accounting basis.

Expenditure is usually measured for an accounting period, typically a financial year (1 July to 30 June the following year).

Collection and usage attributes

Guide for use: Only the usual residents of the household are included.

Code 1. Reference person: May be referred to as *person 1, main tenant or tenant 1, principal tenant, household head* on application or tenancy forms, or where the dwelling is being purchased, referred to as the *mortgagee*. Person must be aged 16 or over.

Code 2. Spouse/partner: Include defacto, wife, husband and partner of the reference person/tenant.

Codes 3 and 4. Son/daughter: Include the son(s) or daughter(s) (or step son(s)/daughter(s)) of the reference person and/or spouse.

Codes 5 and 6. Resident: Include relatives other than son(s)/daughter(s) (step son(s)/daughter(s)), non-related carer, other non-related and non-family member(s).

Data element attributes

Collection and usage attributes

Collection methods:

Collecting this data is quite complex, due to inter-relationships that may exist in a household. Refer to *ABS: Directory of concepts and standards for social, labour and demographic statistics, 1995* for standard questions and approach to collecting data on this metadata item.

This metadata item is used to derive **tenancy composition** for public rental housing and state owned and managed Indigenous housing.

Collection and usage attributes

Guide for use: Income unit reference person is usually the main income recipient for the income unit. There can be more than one income unit per household, such as other family members, e.g. grandparents, aunt or uncle.

A dependant is defined as someone who lives in the primary care of parent(s), carer or guardian, is aged 24 years and under, and:

- is studying full–time (ages 5 and over); and/or
- is not in receipt of a pension, payment or benefit (e.g. Youth Allowance) or a Prescribed Education Scheme payment (e.g. ABSTUDY); and/or
- has an annual income of no more than the amount specified by Centrelink for basic eligibility for Family Tax Benefit Part A.

Collection and usage attributes

<i>Guide for use:</i>	Always include the cent value, using .00 where there are only dollar values.
-----------------------	--

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	The rent charged is the amount of money the household is required to pay. It may differ from market rent and may not have been received.
-----------------------	--

<i>Collection methods:</i>	As the rent charged to a household may change over time, this metadata item should be linked to the date rent is due.
----------------------------	---

Rent charged to household is typically recorded on a weekly basis. For the Commonwealth–State Housing Agreement national data collections, it is recorded as rent charged for the week of 30 June.

Guide for use:

The amount of tax revenue accruing in a period is the amount generated when the underlying transactions or events which give rise to the government's right to collect the taxes occur in that period.

Taxation revenue includes:

- taxes on income, profits and capital gains
- taxes on products e.g. general taxes on provision of goods and services, excises, taxes on international trade and taxes on gambling and insurance
- taxes on production e.g. payroll taxes and other employer's labour force taxes, registration taxes on vehicles used by producers, road transport and maintenance taxes and franchise taxes
- other current taxes, including vehicle registration fees and taxes and stamp duty on vehicle registration by persons or households
- capital taxes, e.g. betterment levies, estate duties, probate and succession and gift duties.

<i>Guide for use:</i>	Diagnosis and procedure codes should be checked against the national ICD-10-AM sex edits, unless the person is undergoing, or has undergone a sex change or has a genetic condition resulting in a conflict between sex and ICD-10-AM code. CODE 3 Intersex or indeterminate Intersex or indeterminate, refers to a person, who because of a genetic condition, was born with reproductive organs or sex chromosomes that are not exclusively male or female or whose sex has not yet been determined for whatever reason. Intersex or indeterminate, should be confirmed if reported for people aged 90 days or greater.
<i>Comments:</i>	The definition for Intersex in Guide for use is sourced from the ACT Legislation (Gay, Lesbian and Transgender) Amendment Act 2003.

Data element attributes

Collection and usage attributes

Collection methods:

Operationally, sex is the distinction between male and female, as reported by a person or as determined by an interviewer.

When collecting data on sex by personal interview, asking the sex of the respondent is usually unnecessary and may be inappropriate, or even offensive. It is usually a simple matter to infer the sex of the respondent through observation, or from other cues such as the relationship of the person(s) accompanying the respondent, or first name. The interviewer may ask whether persons not present at the interview are male or female.

A person's sex may change during their lifetime as a result of procedures known alternatively as sex change, gender reassignment, transsexual surgery, transgender reassignment or sexual reassignment. Throughout this process, which may be over a considerable period of time, the person's sex could be recorded as either Male or Female.

In data collections that use the ICD–10–AM classification, where sex change is the reason for admission, diagnoses should include the appropriate ICD–10–AM code(s) that clearly identify that the person is undergoing such a process. This code(s) would also be applicable after the person has completed such a process, if they have a procedure involving an organ(s) specific to their previous sex (e.g. where the patient has prostate or ovarian cancer).

CODE 3 Intersex or indeterminate

Is normally used for babies for whom sex has not been determined for whatever reason.

Should not generally be used on data collection forms completed by the respondent.

Should only be used if the person or respondent volunteers that the person is intersex or where it otherwise becomes clear during the collection process that the individual is neither male nor female.

CODE 9 Not stated/inadequately described

Is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.

Data element concept attributes

<i>Data element concept:</i>	Community housing provider—support service type
<i>Definition:</i>	The area(s) of assistance, other than housing assistance, that a housing provider is able to offer to a household or tenant.
<i>Context:</i>	Anecdotal evidence suggests community housing providers provide a range of support services to tenants and this is a distinguishing feature of the sector. The collection of this information assists with establishing a profile of community housing providers and demonstrating the diversity and flexibility of the sector in meeting the needs of tenants.

-----------------------------	---

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	Include those areas for which a housing provider did not directly provide the assistance, but ensured the links to appropriate support services were established and maintained.
-----------------------	--

Code 1. Daily living support: Covers assistance that provides support for personal or social functioning in daily life. The purpose of the assistance is generally to enable recipients to live and function in their own homes or normal places of residence (where this is an independent living setting). Such support includes assistance with personal tasks, e.g. showering, dressing and grooming, and domestic tasks, e.g.

washing, cooking, cleaning, , shopping, gardening, and companionship.

Code 2. Personal support: Covers assistance that provides support for successful functioning as an individual or as a family member, e.g. individual advocacy, needs assessment and management, counselling.

Code 3. Community living support: Covers assistance that provides support or develops the capacity for independent living and/or social interaction within the community through the provision of opportunities for learning, developing and maintaining personal and social surviving skills. Includes living skills development, community transport, social and personal development, recreation/leisure.

Code 4. Support for children, families and carers: Covers the provision of care, educational, developmental and recreational activities for children usually between the ages of 0 and 12 years by paid workers. Includes carer support which refers to assistance received by a carer from a substitute carer who provides supervision and assistance to their care recipient in their absence. Includes child care, respite care, parenting skills.

Code 5. Training, vocational rehabilitation and employment: Covers assistance to support people who are disadvantaged in the labour market by providing training, job search skills, help in finding work, placement and support in open employment or, where appropriate, supported employment. Excludes health rehabilitative activities aimed at improvement in functional capacity.

Code 6. Financial and material assistance: Covers assistance that is designed to enhance personal functioning and to facilitate access to community services through the provision of emergency, or immediate, financial assistance and material goods. Includes financial relief, household goods, clothing and furniture, food. Excludes income support provided by Centrelink, such as pensions and benefits, and concessions through the taxation system.

Code 7. Information, advice and referral: Covers assistance that provides information, advice and referral to support personal or social functioning and/or to facilitate access to and use of community services and resources. Includes provision of housing/tenancy, consumer and legal, financial, general service availability information, advice and referral.

Code 8. Other: Covers any other areas of assistance able to be offered to a household or tenant.

Code 9. None: No assistance, other than housing assistance, provided.

Collection methods:

More than one support service type can be recorded.

Comments:

This item is included in the following housing assistance data collections:

Mainstream community housing

Tenancy (rental) unit

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Element
<i>Technical name:</i>	Dwelling—number of tenancy/rental units, total N[N]
<i>METeOR identifier:</i>	270389
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005

Data element concept attributes

<i>Data element concept:</i>	Dwelling—number of tenancy/rental units
<i>Definition:</i>	The unit of accommodation (dwelling or part of a dwelling) to which a rental agreement can be made.
<i>Context:</i>	<p>A tenancy unit is a way of counting the maximum number of distinct rentable units that a dwelling structure can contain. A dwelling structure can be a house, townhouse, duplex, townhouse, flat or boarding/rooming house.</p> <p>In the majority of cases there will be only one rental tenancy unit within a dwelling structure, but in a small number of cases (for example boarding houses, special group homes, semi-institutional dwellings) there may be more than one tenancy unit.</p>
<i>Object class:</i>	Dwelling
<i>Property:</i>	Number of tenancy/rental units

Collection and usage attributes

<i>Guide for use:</i>	The Tenure type of persons in caravans and manufactured homes is determined according to the tenure of the dwelling structure and not the land. Thus, a person who owns a caravan and rents a site in a caravan park is regarded as an owner.
-----------------------	---

Code 1.1. Owner – fully owned: Applies to persons who are not making any payments on mortgages or loans secured against the dwelling. (Thus persons who have repaid a loan but technically not discharged the associated

mortgage are included in this category).

Code 1.2. Owner – being purchased/with mortgage: Applies to persons who are repaying a mortgage or loans secured against the dwelling, regardless of the purpose of the mortgage or secured loan.

Code 2. Renter: Money is exchanged with another person/organisation in return for accommodation. Included in this category are: Boarder, a person who is provided with meals and lodging; and Lodger, a person who is provided with lodging (a room or rooms) in return for money.

Code 2.1. Private renter: Applies to persons who pay rent in exchange for accommodation from private sources.

Code 2.2. Public renter: Applies to persons who are receiving assistance under the public rental housing programs offered by state and territory housing authorities and are paying rent to the relevant government housing authority.

Code 2.3. Community renter: Applies to persons who are receiving assistance under a community housing program offered by not-for-profit community agencies which may or may not be funded by state and territory housing authorities.

Code 3. Rent free: If no money is exchanged for accommodation and the person is not an owner of the dwelling.

Code 4. Life tenure scheme: The person(s) has/have a contract to live in the dwelling for the term of his/her life but without the full rights of ownership and usually has/have limited or no equity in the dwelling. This is a common arrangement in retirement villages.

Code 5. Shared equity or rent/buy scheme: The household is both purchasing some equity in the dwelling, and paying rent for the remainder.

Code 6. None/homeless: No tenure.

Code 7. Other: The tenure does not fit any of the above categories. For example: house-sitting, payment in kind, for a specific service.

Data element attributes

Collection and usage attributes

Guide for use: The waiting list population refers to applicants who are still:

- residing in the state of application;
- eligible for assistance; and
- wishing to pursue their application.

Potential applicants still awaiting eligibility assessment are excluded.

Collection methods: Households that were waitlist applicant type 'transfer applicant/household' and received public housing assistance for that financial year should be counted. This includes households that wish to transfer to another dwelling for reasons other than applying for assistance different from what they currently receive.

Include applicants who have been assisted by another program such as temporary or crisis accommodation while waiting for public housing assistance.

Mutual exchanges and same address transfers are excluded from the count of total number of applicant households on the waiting list.

In the Commonwealth–State Housing Agreement public rental housing and state owned and managed Indigenous housing data collections this metadata item is measured over a financial year.

Discrete Indigenous community

Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>Synonymous names:</i>	Discrete Indigenous community
<i>METeOR identifier:</i>	268994
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005
<i>Definition:</i>	A discrete Indigenous community refers to a geographic location, bounded by physical or cadastral (legal) boundaries, and inhabited or intended to be inhabited by predominantly Indigenous people, with housing or infrastructure that is either owned or managed on a community basis.

Discrete communities include:

- communities in urban areas where the title to a parcel of land has been transferred to an Indigenous organisation, for example, communities on former mission or reserve land in New South Wales and Queensland;
- well established communities and outstations in remote areas;
- Deed of Grant in Trust (DOGIT) communities and their outstations in Queensland as well as the two shires of Aurukun and Mornington Island; and
- communities on Indigenous pastoral properties/leases.

Locations should not be included as communities if they currently have no usual population and are not expected to be reoccupied within the next 12 months.

Specialisation of: Group of persons (Discrete Indigenous community status)

Dwelling

Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>Synonymous names:</i>	Dwelling
<i>METeOR identifier:</i>	268982
<i>Registration status:</i>	NCSIMG, Standard 01/03/2005 NHDAMG, Standard 01/03/2005

Definition: A structure or a discrete space within a structure intended for people to live in or where a person or group of people live. Thus a structure that people actually live in is a dwelling regardless of its intended purpose, but a vacant structure is only a dwelling if intended for human residence. A dwelling may include one or more rooms used as an office or workshop provided the dwelling is in residential use.

Context: Dwellings are the main counting unit in the housing sector. Dwellings are reported for a variety of purposes including number of untenanted or tenanted, and occupied or vacant dwellings. Dwellings may be owned and/or, managed, and/or available for a use by a specific program, including headleased stock from **private** and **government** sources. A dwelling includes a **boarding house building** and **boarding house units**.

Specialisation of: Building (Purpose)

Collection and usage attributes

Guide for use: **Boarding house rooms** or beds are not identified as separate dwellings unless they are self-contained. Self-contained rooms are therefore defined as units and are counted as a separate dwelling.

For the Commonwealth-State Housing Agreement public rental housing and state owned and managed Indigenous housing data collections, the number of tenancy (rental) units is used as a proxy for counting the number of dwellings.

Household

Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>METeOR identifier:</i>	268977
<i>Registration status:</i>	NCSIMG, Standard 01/03/2005 NHDAMG, Standard 01/03/2005
<i>Definition:</i>	A group of two or more related or unrelated people who usually reside in the same dwelling, and who make common provision for food or other essentials for living. Or a single person living in a dwelling who makes provision for his or her own food and other essentials for living, without combining with any other person.
<i>Context:</i>	Together with family, household is considered one of the basic groups of social aggregation. Information on household numbers and composition aids in identifying groups within the population such as Indigenous households or the number of people living alone.
<i>Specialisation of:</i>	Group of persons (Household status)

Collection and usage attributes

Guide for use: For the Commonwealth–State Housing Agreement (CSHA) data collections, the number of tenancy agreements is a practical proxy for calculating the number of households receiving housing assistance.

The persons in the group may pool their incomes and have a common budget to a greater or lesser extent: they may be related or unrelated persons, or a combination of both.

Only usual residents of the household are included as members of the household. Visitors to a household are, by definition, excluded from the household.

Housing assistance agency

Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>Synonymous names:</i>	Agency
<i>METeOR identifier:</i>	302078
<i>Registration status:</i>	NHDAMG, Standard 10/02/2006
<i>Definition:</i>	An organisation or organisational sub–unit that is responsible for the provision of housing assistance to people.

Defining Agency is extremely important for data collection, as it is the level at which most data are collected in the housing assistance and other human service areas.

Regardless of the way in which an organisation is funded, a housing assistance agency is the level of the organisation responsible for the provision of housing assistance to people. In some instances one organisation will have more than one or many agencies.

Collection and usage attributes

Guide for use: Different collections define Agency differently according to their context and varying need for information on the different levels of organisations providing services or assistance. Individual data collections will therefore need to further specify what a housing assistance agency is for their collection purposes.

In the Commonwealth–State Housing Agreement (CSHA) mainstream community housing data collection, a housing assistance agency corresponds to the definition of 'Community housing provider'. In the CSHA public rental housing and state owned and managed Indigenous housing data collections, a housing assistance agency corresponds to the state or territory housing authority (Head Office).

Income unit

Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>Synonymous names:</i>	Income unit
<i>METeOR identifier:</i>	268986
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005
<i>Definition:</i>	One person or a group of related persons within a household, whose command over income is shared, or any person living in a non private dwelling who is in receipt of personal income.
<i>Context:</i>	Income units are restricted to relationships of marriage (registered or de facto) and of parent/ dependant who usually reside in the same household. This means that an income unit can be defined as: <ul style="list-style-type: none">• a married couple or sole parent, and dependent children only; or• a married couple only with no dependent children present; or• a person who is not related to any other household member either by marriage or by the parent/dependant relationship. This is the standard statistical unit for analyses of economic wellbeing, and can be an important measure in assessing the needs and circumstances of individuals and families.

Gross capital expenditure

Identifying and definitional attributes

<i>Metadata item type:</i>	Property
<i>METeOR identifier:</i>	269024
<i>Registration status:</i>	NHIG, Standard 01/03/2005 NHDAMG, Standard 10/02/2006
<i>Definition:</i>	Expenditure on the acquisition or enhancement of a non-financial asset .
<i>Property group:</i>	Financial characteristics

Collection and usage attributes

Guide for use: National health data dictionary specific:

Gross capital expenditure is capital expenditure as reported by the particular establishment having regard to state health authority and other authoritative guidelines as to the differentiation between capital and recurrent expenditure. (A concise indication of the basis on which capital and recurrent expenditure have been differentiated is to form part of national minimum data sets).

National housing assistance data dictionary specific:

Expenditure on the acquisition or enhancement of an asset (excluding financial assets). A non-financial asset is an entity functioning as a store of value, over which ownership may be derived over a period of time, and which is not a financial asset. Capital includes: acquisitions (purchase of properties); construction costs; redevelopment and improvement (of properties); land acquisitions and development; joint ventures.

Recurrent expenditure

Identifying and definitional attributes

<i>Metadata item type:</i>	Property
<i>METeOR identifier:</i>	269132
<i>Registration status:</i>	NHIG, Standard 13/05/2005 NHDAMG, Standard 01/03/2005
<i>Definition:</i>	Expenditure which does not result in the acquisition or enhancement of an asset.
<i>Property group:</i>	Financial characteristics

Collection and usage attributes

Guide for use: National Housing Assistance Data Dictionary specific:

Recurrent expenditure on goods and services is expenditure, which does not result in the creation or acquisition of fixed assets (new or second-hand). It consists mainly of expenditure on wages, salaries and supplements, purchases of goods and services and consumption of fixed capital (depreciation).

When fees charged for goods and services are offset against recurrent expenditure, the result equates to final consumption expenditure in the Australian Bureau of Statistics' national accounts framework.

Includes:

- Operating expenses
- Tenancy manager revenue and expense components.

Australian Standard Classification of Languages 2005

Identifying and definitional attributes

<i>Metadata item type:</i>	Classification Scheme
<i>Synonymous names:</i>	ASCL 2005
<i>METeOR identifier:</i>	304118
<i>Registration status:</i>	NHIG, Standard 08/02/2006 NCSIMG, Standard 30/09/2005 NHDAMG, Standard 10/02/2006
<i>Definition:</i>	The Australian Bureau of Statistics (ABS) classification for the languages spoken by Australians.
<i>Classification structure:</i>	The ASCL has a three-level hierarchical structure.

Languages are grouped together into progressively broader categories on the basis of their evolution from a common ancestral language, and on the basis of geographic proximity of areas where a particular language originated.

Collection and usage attributes

Guide for use: The ASCL is intended for use in the collection, aggregation and dissemination of data relating to the language use of the Australian population, or subsets of the population.

Indexes in alphabetical and numerical order are available, see the *Origin:* attribute.

Australian Standard Classification of Occupations 2nd edition

Identifying and definitional attributes

Metadata item type:	Classification Scheme
Synonymous names:	ASCO 2nd edn
METeOR identifier:	270547
Registration status:	NHIG, Standard 01/03/2005 NCSIMG, Standard 01/03/2005 NHDAMG, Standard 01/03/2005

Definition: The Australian Bureau of Statistics (ABS) classification for occupations.

Classification structure: The ASCO Second Edition is a hierarchically structured classification with five levels of aggregation. The nine Major Groups are distinguished from each other on the basis of skill level and, where necessary, the broad concept of skill specialisation.

Skill level is a function of the range and complexity of the set of tasks involved. The greater the range and complexity of the set of tasks, the greater the skill level of the occupation. The criteria to measure skill level are the formal education and/or training (ie. primary, secondary or tertiary education) and previous experience usually required for entry to the occupation.

Skill specialisation of an occupation is a function of the field of knowledge required, tools and equipment used, materials worked on, and goods or services produced in relation to the tasks performed. Skill specialisation is used to group occupations according to type, rather than level of skill. The definition of skill specialisation remains unchanged from the First Edition but includes reference to non-production based operations.

Collection and usage attributes

Guide for use: Supersedes the Australian Standard Classification of Occupations, First Edition. for concordance tables see *Origin*.

Comments: ISCO-88 also uses skill level and skill specialisation as criteria to structure the occupation classification.

The 10 major groups in ISCO-88 are broadly consistent similar to the nine ASCO, Second Edition major groups. The most significant difference at the major group level is that ISCO-88 has identified Skilled Agricultural and Fishery workers as a separate major group, where as ASCO Second Edition includes Farmers and Farm Managers as a sub-group in Major Group 1 Managers and Administrators, and Skilled Agricultural and Horticultural workers as a sub-major group in Major Group 4 Tradespersons and Related Workers.

ISCO-88 also includes a separate Major Group 0, for the Armed Forces. In ASCO Second Edition, jobs held by members of the Armed Forces are classified together with their civilian equivalents where these exist and to a number of other specific occupations.

In common with ISCO-88, ASCO Second Edition now incorporates three sub-major group as a level of aggregation between the major and minor groups.

ASCO Second Edition (ASCO) is currently under review. The Australian Bureau of Statistics (ABS) and Statistics New Zealand (SNZ) will undertake the project jointly. A joint publication will be produced, the Australian and New Zealand Standard Classification of Occupations (ANZSCO), which will be available electronically on the ABS and SNZ web sites.

It is envisaged that ANZSCO will be implemented in relevant ABS and SNZ statistical collections from 2006 onwards.

Registration status: NHIG, Standard 01/03/2005
NCSIMG, Standard 01/03/2005
NHDAMG, Standard 10/02/2006

Definition: The numeric descriptor for a postal delivery area, aligned with locality, suburb or place for the address of a party (person or organisation), as defined by Australia Post.

Context: Postcode is an important part of a person's or organisation's postal address and facilitates written communication. It is one of a number of geographic identifiers that can be used to determine a geographic location. Postcode may assist with uniquely identifying a person or organisation.

Collection and usage attributes

Guide for use: The postcode book is updated more than once annually as postcodes are a dynamic entity and are constantly changing.

Adoption

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327208
<i>Registration status:</i>	NCSIMG, Standard 01/03/2005
<i>Definition:</i>	Adoption is the legal process by which a person legally becomes a child of the adoptive parents and legally ceases to be a child of his/her existing parents.
<i>Context:</i>	Children and family services.

Collection and usage attributes

<i>Comments:</i>	The adoption order severs the legal relationship between the biological parents and the child. A new birth certificate is issued to the child bearing the name(s) of his/her adoptive parent(s) as the natural parent(s) and the new name of the child, where a change has occurred.

Boarding house building

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327408
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005
<i>Definition:</i>	A separate building (also referred to as a rooming or lodging house) containing multiple boarding/rooming/lodging house bedrooms and/or boarding house units .
<i>Context:</i>	The identification of boarding house buildings from individual boarding house rooms or units is important in calculating the operational costs for this type of dwelling.

Collection and usage attributes

<i>Guide for use:</i>	<p>In Victoria, the term 'rooming house' is used and the term 'boarding house' is used to distinguish cases where meals are also provided. Section 5A of the Social Security Act 1991 states that:</p> <p>5A(5A) A person's accommodation is exempt accommodation (i.e. they are eligible for Commonwealth Rent Assistance (CRA) at the full single rate) if it is in premises that are, in the Secretary's opinion, a boarding house, guest house, hostel, private hotel, rooming house, lodging house or similar premises.</p> <p>5A(5B) In forming an opinion about a person's accommodation for the purpose of subsection (5A), the Secretary is to have regard to the characteristics of the accommodation including, in particular, whether or not the following are characteristics of the accommodation:</p> <p>(a) the premises are known as a boarding house, guest house, hostel, hotel, private hotel, rooming house, lodging house or similar premises;</p> <p>(b) a manager or administrator (other than a real estate agent) is retained to manage the premises or administer the accommodation on a daily or other frequent regular basis;</p> <p>(c) staff are retained by the proprietor or manager of the premises to work in the premises on a daily or other frequent regular basis;</p> <p>(d) the residents lack control over the day-to-day management of the premises;</p> <p>(e) there are house rules, imposed by the proprietor or manager, that result in residents having rights that are more limited than those normally enjoyed by a lessee of private residential accommodation (for example, rules limiting the hours of residents' access to their accommodation or limiting residents' access to cooking facilities in the premises);</p> <p>(f) the person does not have obligations to pay for his or her costs of gas, water or electricity separately from the cost of the accommodation;</p> <p>(g) the accommodation is not private residential accommodation, having regard to:</p> <ul style="list-style-type: none">• the number and nature of bedrooms in the premises; or• the number of people who are not related to one another living at the premises; or• the number and nature of bathrooms in the premises;
-----------------------	--

(h) the person's accommodation has not been offered to the person on a leasehold basis;

(i) there is no requirement that the person pay a bond as security for either the payment of rent or the cost of any damage caused by the person, or for both;

(j) the person's accommodation is available on a daily or other short-term basis.

5A(5C) Each of the characteristics set out in subsection 5(B) points towards the accommodation in question being exempt accommodation (i.e. the person is eligible for CRA at the full single rate)

Disability

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327304
<i>Registration status:</i>	NCSIMG, Standard 01/03/2005 NHDAMG, Standard 01/03/2005
<i>Definition:</i>	Disability is the umbrella term for any or all of: an impairment of body structure or function, a limitation in activities, or a restriction in participation.

Disability is a multi-dimensional and complex concept and is conceived as a dynamic interaction between health conditions and environmental and personal factors (WHO 2001:6).

Collection and usage attributes

Comments: Many different 'definitions' of disability are used in Australia, both in administrative data collections and in Acts of Parliament. The consistent identification of disability in national data collections has been recommended in a number of reports, for instance to enable:

- the monitoring of access to generic services by people with a disability;
- the collection of more consistent data on disability support and related services, including data on service use by different groups;
- population data and service data to be related, thereby improving the nation's analytical capacity in relation to the need for and supply of services; and
- improved understanding of the relationship between disability, health conditions and other health outcomes.

Defining disability makes it possible to determine the number of people who are accessing services, both disability specific and generic, and also those with a disability in the general population with unmet need. Better definition of disability will aid better targeting of resources to those in need.

Disability arises from the interaction between health conditions and environmental and personal factors. A health condition may be a disease (acute or chronic), disorder, injury or trauma. Environmental factors make up the physical, social and attitudinal environment in which people live and conduct their lives. Personal factors relate to the individual, such as age, sex and Indigenous status.

The concept 'Disability' can be described using a combination of related metadata items as building blocks.

The metadata items selected may vary depending on the definition of disability used. For example, in hospital rehabilitation, the focus may be on the impairment and **activity** dimensions and in community-based care the focus may be primarily on participation. Some applications may require a broad scope for inclusion (e.g. discrimination legislation). Data collections relating to services will select combinations of the data elements, which best reflect the eligibility criteria for the service.

This glossary item is based on the International Classification of Functioning, Disability and Health (ICF). The ICF was endorsed by the World Health Assembly in 2001 as a reference member of the WHO Family of International Classifications and of the Australian Family of Health and Related Classifications (endorsed by the National Health Information Management Group in 2002).

The ICF provides a framework for the description of human functioning and disability. The components of ICF are defined in relation to a health condition. A health condition is an ‘umbrella term for disease (acute or chronic), disorder, injury or trauma’ (WHO 2001). A health condition may be recorded, for example, as Episode of care principal diagnosis, code (ICD-10-AM 3rd Ed) ANN{.N[N]} and Episode of care additional diagnosis, code (ICD-10-AM 3rd Ed) ANN{.N[N]}.

Family

Identifying and definitional attributes

Metadata item type:	Glossary Item
METeOR identifier:	327232
Registration status:	NCSIMG, Standard 01/03/2005 NHDAMG, Standard 01/03/2005
Definition:	Two or more people related by blood, marriage (including step–relations), adoption or fostering and who may or may not live together. They may form the central core of support networks for individuals.
Context:	Data on families are essential elements for the study of the well being of family groups and in this way for the study of the well being of individuals. They are a tool for assessing the type of and level of support to which a person has access. By defining the extended family as the central support network for individual, support which would not have been defined as accessible to the individual using the 'Household family' definition becomes apparent. It is important to recognise the 'family beyond the household' when examining types and levels of support available to individuals.

Collection and usage attributes

Comments:	<p>The 'household family' has been traditionally viewed as a building block of society and it is the predominant unit reported statistically and historically. However, the 'household family', since it is tied to the idea of co–residence, forms only a snapshot in time and refers only to related people who live in the same household at a point in time. Related persons who leave the central household live in other households may still participate in the lives of other family members they do not live with in a variety of ways, including financial, material, physical, emotional, legal and spiritual. For instance, frail older people may receive help from their adult children even though they do not live in the same household.</p> <p>The definition for this glossary item differs from the Australian Bureau of Statistics (ABS) standard. This is necessary because the ABS standard is based on household collection, which is not suitable, in many community services' areas. The community service definition needs to be broader to incorporate families that exist outside of households.</p>

Geographic indicator

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327306
<i>Registration status:</i>	NCSIMG, Standard 01/03/2005
<i>Definition:</i>	A classification scheme that divides an area into mutually exclusive sub-areas based on geographic location. Some geographic indicators are:

- Australian Standard Geographical Classification (ASGC, ABS Cat. no. 1216.0),
- administrative regions,
- electorates,
- Accessibility/Remoteness Index of Australia (ARIA),
- Rural, Remote and Metropolitan Area Classification (RRMA), and
- country.

Context: To enable the analysis of data on a geographical basis. Facilitates analysis of service provision in relation to demographic and other characteristics of the population of a geographic area.

Collection and usage attributes

Comments: Person (address)—Australian postcode (Postcode datafile), code [NNNN] is not included in the above listing, as it is, strictly speaking, not a geographic indicator. Sometimes postcodes are used in the analysis of data on a geographical basis, which involves a conversion to Statistical Local Area (an Australian Bureau of Statistics geographical structure). This conversion results in some inaccuracy of information. However, in some data sets Person (address)—Australian postcode (Postcode datafile), code [NNNN]; is the only geographic identifier, therefore the use of other more accurate indicators (for example, conversion from address line to Statistical Local Area) is not always possible.

Head-leased dwelling (private)

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327414
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005
<i>Definition:</i>	Dwellings owned by private individuals or private corporations that are leased to Commonwealth-State Housing Agreement (CSHA) housing providers via head-leasing arrangements. The CSHA housing provider is usually responsible for tenant selection and tenancy management functions.
<i>Context:</i>	Head-leasing involves at least two leases: one between the dwelling owner and the lessee, and one between the provider and the tenant. The Residential Tenancies Act applies to both leases.

Collection and usage attributes

<i>Comments:</i>	Head-leasing is commonly undertaken in the community housing sector, where non-Government organisations head-lease housing stock from the private sector and state and territory Governments, and sub lease it directly to the tenants. It is important to identify those dwellings that are head-leased from the private sector, as maintenance and other management costs are generally incurred by the owner, and therefore may not be captured in the annual CSHA data collections.

Homeless (SAAP)

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327316
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005
<i>Definition:</i>	<p>A person is homeless if he or she does not have access to safe, secure and adequate housing. Unsafe, insecure and inadequate housing includes housing:</p> <ul style="list-style-type: none">• in which the client did not feel safe (this can include the client's own home);• in which the client did not have a legal right to continued occupation of their home (security of tenure);• that lacked the amenities or resources necessary for living (such as adequate heating, plumbing or cooking facilities); and• provided by a Supported Accommodation Assistance Program (SAAP) agency of other emergency accommodation agency.

Collection and usage attributes

<i>Guide for use:</i>	This is the broadest definition of homeless and is not used for Commonwealth–State Housing Agreement (CSHA) reporting purposes. The definition of homeless that is used in CSHA data collections can be found in the 'Household – Greatest need status' metadata item.
<i>Comments:</i>	<p>There is considerable concern over the number of homeless people in society and the assistance they require.</p> <p>Collecting information on homeless people is problematic, as the concept of 'homelessness' encompasses elements in addition to whether, someone resides in a dwelling or not.</p> <p>A SAAP client should either be homeless or at imminent risk of becoming homeless, as defined by the SAAP Act. A person who requires the support of a SAAP worker to maintain their current housing situation is at imminent risk.</p>

Proxy occupancy standard

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327448
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005
<i>Definition:</i>	A measure of the appropriateness of housing related to the household size and household composition.
<i>Context:</i>	The measure is used to determine the bedroom requirements of a household.

Collection and usage attributes

Guide for use: Households that require two or more additional bedrooms to meet the standard are considered to be overcrowded.

For sole parent or couple households with more than four children the dwelling size in terms of bedrooms should be the same value as the total number of children in the household.

Where more than one of the groups specified in the occupancy standard is present, the needs of the two or more groups should be added together. For example, a sole parent with one child living with the sole parent's parents (three generations) would require 4 bedrooms, that is, 2 bedrooms for the sole parent and child and 2 bedrooms for the married couple.

The appropriate size is not necessarily the current dwelling size.

Only the usual residents of the household are included.

Adults include children aged 16 or more.

Household component	Dwelling size required
Single adult only	1 bedroom
Single adult (group)	1 bedroom (per adult)
Couple with no children	2 bedrooms
Sole parent or couple with 1 child	2 bedrooms
Sole parent or couple with 2 or 3 children	3 bedrooms
Sole parent or couple with 4 children	4 bedrooms

Comments: The proxy occupancy standard is a nationally agreed standard for CSHA reporting and does not necessarily reflect the jurisdictions/agency's own allocation policy.

The standard is currently being reviewed by the NHDAMG to improve the applicability across all household types.

There are other standards that are used to measure overcrowding, for example the Canadian National Occupancy Standard. The standard here is based on the standard in Version 2 of the NHADD with the only change being that sole parents or couples with more than four children have a required bedroom size equivalent to the number of children.

<i>METeOR identifier:</i>	327264
<i>Registration status:</i>	NCSIMG, Standard 01/03/2005
<i>Definition:</i>	A process, technique or method that enables the bringing together of two or more records that are believed to belong to the same individual.
<i>Context:</i>	Record linkage may facilitate improved service provision, treatment or case management to individual clients.

Collection and usage attributes

<i>Comments:</i>	Linkage can occur across data systems or within data systems and may be done by using a range of identifiers.
------------------	---

For statistical purposes, including planning, research or the measurement of service or program outcomes, record linkage facilitates separating multiple items clustered around individuals from total counts (for example, double counting of clients can be reduced when calculating total numbers of clients across several agencies).

The proposed use of a linkage key in the Home and Community Care program (HACC) Minimum Data Set is intended to make it possible to count the number of HACC clients (without counting clients more than once) and the services which they receive. The Commonwealth–State Territory Disability Agreement National Minimum Data Set is using the statistical linkage key based on that for the HACC Minimum Data Set.

Tenancy composition

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327444
<i>Registration status:</i>	NHDAMG, Standard 01/03/2005
<i>Definition:</i>	The grouping of dwelling or tenancy occupants based on the presence or absence of one or more reported couple or parent–child relationships. Households can be single family, group or mixed composition households.

A single family household is a household consisting of a main tenant with or without a spouse and with or without children. A group household is a household consisting of two or more tenants who are aged 16 years and over and not in a reported couple or parent–child relationship. A mixed composition household is one which is neither a single family nor group household (they may contain multiple single family households).
