

National Health Performance Framework

The [National Health Performance Framework](#) consists of three domains; health status, determinants of health and health system performance. The inclusion of the three domains reflects the fact that health status are influenced by the impacts of health determinants and health system performance. In developing the framework, equity is considered to be integral to each of the three tiers.

The framework can be used to support benchmarking for health system improvement and facilitate use of data at the health service unit level for benchmarking purposes.

The framework was developed by the National Health Performance Committee (NHPC) which was established in 1999 by the Australian Health Ministers' Conference.

This framework was reviewed by the NHPC in 2007-08. A revised framework was agreed by the National Health Information Standards and Statistics Committee (NHISSC) and noted by the Health Ministers in September 2009.

Dimensions of this framework

- [Domain 1- Health status](#)

How healthy are Australians? Is it the same for everyone? Where is the most opportunity for improvement?

Sub-dimensions of this framework

- [Deaths](#)

Mortality rates and life expectancy measures.

• **Domain 3 - Health system performance**

How does the health system perform ? What is the level of quality of care across the range of patient care needs? Is it the same for everyone? Does the system deliver value for money and is it sustainable.

Sub-dimensions of this framework

◦ **Accessibility**

People can obtain health care at the right place and time irrespective of income, physical location and cultural background.
