Non-medical determinants of health

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 392618

Description: Non-medical determinants of health are those that fall outside the sphere of

medical/health care, generally speaking, but that have been shown to affect health

status and, in some cases, access to health services.

Dimensions of this framework

Environmental factors

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 392623

Description: Environmental factors with the potential to influence human health. Examples

include water quality.

Genetic factors

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 392622

Description: Factors outside those normally influenced by individual behaviours or by the

social, economic or physical environment; genetic factors determine predisposition to certain conditions. Examples include rate of genetically

determined diseases.

Health behaviours

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 392621

Description: Aspects of personal behaviour and risk factors that epidemiological studies

have shown to influence health status. Examples include smoking rate and

physical activity.

Social and community factors

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 392620

Description: Measures the prevalence of social and community factors, such as social

support, life stress, or social capital that epidemiological studies have shown

to be related to health.

Examples include school readiness, social support, housing affordability and

literacy.

Indicators in this framework

• National Disability Agreement: b(1)-Proportion of people with disability who participate in social and community activities, 2012

Community Services (retired), Superseded 23/05/2013

 National Disability Agreement: b(2)-Proportion of people with disability who participate in social and community activities, 2012

Community Services (retired), Superseded 23/05/2013

 National Disability Agreement: b(3)-Proportion of people with disability who participate in social and community activities, 2012

Community Services (retired), Superseded 23/05/2013

Socioeconomic factors

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 392619

Description: Indicators related to the socioeconomic characteristics of the population that

epidemiological studies have shown to be related to health. Examples include unemployment rate, low income rate and high school graduation.
