# Health status

## Identifying and definitional attributes

<b>Item type:</b>	Framework Dimension
<b>METEOR identifier:</b>	392633
<b>Description:</b>	Deaths, or measures of length of life, are perhaps the most widely used and available health status indicators. These include a range of age-specific mortality rates, as well as derived indicators such as life expectancy and potential years of life lost.

## Dimensions of this framework

- [Deaths](#)

### Identifying and definitional attributes

<b>Item type:</b>	Framework Dimension
<b>METEOR identifier:</b>	392637
<b>Description:</b>	A range of age-specific and condition specific mortality rates, as well as derived indicators.  Examples include infant mortality, life expectancy, potential years of life lost, circulatory deaths, unintentional injury deaths.

- [Health conditions](#)

### Identifying and definitional attributes

<b>Item type:</b>	Framework Dimension
<b>METEOR identifier:</b>	392636
<b>Description:</b>	Alterations of attributes of the health status of an individual which may lead to distress, interference with daily activities, or contact with health services; it may be a disease (acute or chronic), disorder, injury or trauma, or reflect other health-related states such as emergency, aging, stress, congenital anomaly, or genetic predisposition. Examples include Arthritis, diabetes, chronic pain, depression, food and waterborne diseases, injury hospitalization.

- [Human function](#)

### Identifying and definitional attributes

<b>Item type:</b>	Framework Dimension
<b>METEOR identifier:</b>	392635
<b>Description:</b>	Levels of human function are associated with the consequences of disease, disorder, injury and other health conditions; they include body function/structure (impairments), activities (activity limitations, and participation (restrictions in participation). Examples include functional health, disability days, activity limitation, health expectancy, disability free life expectancy.

- [Well-being](#)

## Identifying and definitional attributes

<b>Item type:</b>	Framework Dimension
<b>METEOR identifier:</b>	392634
<b>Description:</b>	Broad measures of the physical, mental and social well-being of individuals. Examples include self-rated health, self-esteem.

### Indicators in this framework

- [National Disability Agreement: b\(1\)-Proportion of people with disability who participate in social and community activities, 2012](#)  
[Community Services \(retired\)](#), Superseded 23/05/2013
- [National Disability Agreement: b\(2\)-Proportion of people with disability who participate in social and community activities, 2012](#)  
[Community Services \(retired\)](#), Superseded 23/05/2013
- [National Disability Agreement: b\(3\)-Proportion of people with disability who participate in social and community activities, 2012](#)  
[Community Services \(retired\)](#), Superseded 23/05/2013
