Education and knowledge

Identifying and definitional attributes

Item type:	Framework Dimension
METEOR identifier:	392707
Description:	Education and knowledge help to empower individuals and allow them to become more autonomous within society. Education is increasingly viewed as a lifelong process by which both individuals and their communities benefit from the acquisition of new knowledge and skills. Education relates to many other facets of society, including employment, health and participation in the civic, cultural and social life of communities. Three major indicators of education and knowledge are : participation, attainment and literacy.
