Inputs per output unit

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 392715

Description: Technical efficiency indicators measure how well services use their resources (inputs) to produce outputs for the purpose of achieving desired outcomes. Government funding per unit of output delivered is a typical indicator of technical efficiency.

Comparisons of the unit cost of a service are a more meaningful input to public policy when they use the full cost to government, accounting for all resources consumed in providing the service. Problems can occur when some costs are not included or are treated inconsistently (for example, superannuation, overheads or the user cost of capital).
