Access

Identifying and definitional attributes

Item type: Framework Dimension

METEOR identifier: 392717

Description: Access indicators measure how easily the community can obtain a service. Access has two main dimensions, undue delay (timeliness) and undue cost (affordability). Timeliness indicators can include waiting times (for example, in public hospitals and for aged care services). Affordability indicators relate to the proportion of income spent on particular services (for example, out-of-pocket expenses in children's services).
