Cancer treatment—surgical procedure for cancer, procedure code (ACHI 7th edn) NNNNN-NN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Surgical procedure for cancer
METEOR identifier:	393426
Registration status:	Health , Superseded 02/05/2013
Definition:	The cancer-directed surgical procedure performed during the initial course of treatment for cancer, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Cancer treatment—surgical procedure for cancer
METEOR identifier:	394415
Registration status:	Health , Superseded 08/05/2014
Definition:	The cancer-directed surgical procedure performed during the initial course of treatment for cancer.
Object class:	Cancer treatment
Property:	Surgical procedure for cancer

Value domain attributes

Identifying and definitional attributes

Value domain:	Procedure code (ACHI 7th edn) NNNNN-NN
METEOR identifier:	391345
Registration status:	Health , Superseded 02/05/2013 National Health Performance Authority (retired) , Retired 01/07/2016
Definition:	The Australian Classification of Health Intervention (7th edition) code set representing procedures.

Representational attributes

Classification scheme:	Australian Classification of Health Interventions (ACHI) 7th edition
Representation class:	Code
Data type:	Number
Format:	NNNNN-NN
Maximum character length:	7

Data element attributes

Collection and usage attributes

Guide for use:	The procedure code is collected for all cancer-directed surgery performed during initial treatment for cancer. The initial treatment includes all treatments performed from diagnosis and before disease progression or recurrence. Cancer-directed surgery refers to all surgery that destroys or modifies cancer tissue anywhere in the body. Cancer-directed surgery may be palliative (to control symptoms, alleviate pain, or make the patient more comfortable), or curative. Biopsies that remove the entire tumour and/or leave only microscopic margins are to be recorded here. The procedure code for each surgical treatment episode should be entered separately. Endocrine surgery for the purpose of modifying hormone levels is recorded with data element <i>Cancer treatment—systemic therapy procedure, code N[N]</i>.
Collection methods:	This information should be obtained from the patient's medical record.
Comments:	The collection of specific treatment information is useful to evaluate patterns of care, the effectiveness of different treatment modalities, and treatment by patient outcome.
